

UNIVERSITY OF KOTA

SCHEME OF EXAMINATION

AND

COURSES OF STUDY

**Department of Pure & Applied Physics
Faculty of Science**

B.Sc. (Hons.) V & VI Semester

Fifth Semester (July-December, 2025)
Sixth Semester (January-June, 2026)

UNIVERSITY OF KOTA
MBS Marg, Near Kabir Circle, KOTA (Rajasthan)-324 005
INDIA

Edition: 2025

Bachelor of Science (B.Sc. Hons.) Physics

Semester Scheme of Examination

Year / Semester	Serial Number, Code and Nomenclature of Paper			Duration of Exam	Teaching (Hrs./Week) and Credits			Distribution of Maximum Marks			Minimum Pass Marks	
	Number	Code	Nomenclature			L	P	C	Internal Assess.	Sem. Assess.	Total Marks	Internal Assess.
II1rd Year V Semester	5.1	DCC-PHY	Physics-V Nuclear and Particle Physics	3 Hrs.	4	--	4	30	70	100	12	28
	5.2	DCC-PHY	Physics Practical-V	6 Hrs.	--	4	2	--	50	50	--	25
	5.3	DCC-MAT	Mathematics-V	3 Hrs.	4	--	4	30	70	100	12	28
	5.4	DCC-MAT	Mathematics Practical-V	6 Hrs.	--	4	2	--	50	50	--	25
	5.5	DSE-PHYH	Physics (Hons)-V Digital Electronics	3 Hrs.	4	--	4	30	70	100	12	28
	5.6	DSE-PHYH	Physics Hons Practical-V	6 Hrs.	--	4	2	--	50	50	--	25
	5.7/5.8	VAC/SEC	Mulya Pravah/ Course-II	1.5 Hrs.	2	--	2	--	50	50	--	20
	Total (I Semester)			--	14	12	20	90	410	500	--	--
IIIrd Year VI Semester	6.1	DCC-PHY	Physics-VI Mathematical Physics	3 Hrs.	4	--	4	30	70	100	12	28
	6.2	DCC-PHY	Physics Practical-VI	6 Hrs.	--	4	2	--	50	50	--	25
	6.3	DCC-MAT	Mathematics-VI	3 Hrs.	4	--	4	30	70	100	12	28
	6.4	DCC-MAT	Mathematics Practical-VI	6 Hrs.	--	4	2	--	50	50	--	25
	6.5	DSE-PHYH	Physics (Hons) -VI Solid State Physics	3 Hrs.	4	--	4	30	70	100	12	28
	6.6	DSE-PHYH	Physics Hons Practical-VI	6 Hrs.	--	4	2	--	50	50	--	25
	6.7/6.8	VAC/SEC	Mulya Pravah/ Course-II	1.5 Hrs.	2	--	2	--	50	50	--	20
	Total (II Semester)			--	14	12	20	90	410	500	--	--
Total (I and II Semesters)			--	28	24	40	--	--	1000	--	--	

Note: The syllabi of the DCC-PHY, DCC-MAT and AEC papers are same as prescribed for the B.Sc. Pass Course by the concerned BOS.

Rules & Regulations

Objectives of the Course:

Innovation and Employability-Physics is concerned with the study of the universe from the smallest to the largest scale, why it is the way it is and how it works. Such knowledge is basic to scientific progress. Although physics is a fundamental science it is a very practical subject. Physicists have to be able to design and build new instruments, from satellites to measure the properties of planetary atmospheres to record-breaking intense magnetic fields for the study of condensed matter. Many of the conveniences of modern life are based very directly on the understanding provided by physics. Many techniques used in medical imaging are derived directly from physics instrumentation. Even the internet was a spin-off from the information processing and communications requirement of high-energy particle physics.

The Department of Pure and Applied Physics has been started the Hons. course from July, 2013. Our current programme involves the students in a holistic experience of Physics education and instills the spirit of research in the formative years of their careers. This flagship programme of University is a pioneering model in Indian science and education, imparting education in Physics while simultaneously encouraging a participation in research. This course shall provide the thorough knowledge of Pure and Applied branches of Physics with extensive theoretical and experimental knowledge in major areas of Physics such as Material science, Plasma science, Advanced Electronics, Energy Studies etc. at Masters' level. This course also emphasizes on the Communication & Presentation skills of the students. The students after completing the course shall be placed in premier research institutes and companies in India and abroad, qualify NET/GATE/JEST examinations and eligible for M.Tech., PhD and teaching.

Programme and Course outcomes-At the end of the program, the students will develop a strong analytical skill and will be able to study critically a physics problem, solve the problem using different tools and present the result/conclusion. They will develop a good communication skill such that they can explain complicated physics technical terminologies in simple manner. They will be aware of the information available nowadays and will be able to retrieve information from e-libraries and other e-sources available using internet. They will be aware of their ethical and moral values and not practice fabrication and plagiarism. They will know of their responsibility of preserving our environment and the world. Finally, they will be ready to work individually as well as in a team.

The students of B. Sc. Physics Hons will be covering Mechanics, Math Physics, Electricity and Magnetism, Waves and Optics, Thermal Physics, Digital Systems, Quantum Mechanics, Solid State Physics, Electromagnetism and Statistical Mechanics. Over and above these they will study 06 discipline specific elective and 02 generic elective courses. In most of these courses they will have hands-on experiences on different experiments based on the theories they have learnt.

Duration of the Course:

The course B.Sc. (Hons.- Physics) shall consist of three academic years divided in to six semesters.

Eligibility for Admission:

The basic eligibility for admission to the course is XII with Physics, Chemistry and Mathematics with minimum marks for GEN category candidates of Rajasthan-55%; Other state-60%; SC/STOBC/SOBC- Minimum Pass Marks. The admission in the course is based on merit of XII class.

Structure of the Programme:

The B.Sc. (Hons.-Physics) consists of:

- (i) Core and applied courses of theory as well as practical papers which are compulsory for all students.
- (ii) Dissertation / Project Work / Practical training / Field work, which can be done in an organization (Government, Industry, Firm, Public Enterprise, *etc.*) approved by the Department.

Attendance:

Every teaching faculty handling a course shall be responsible for the maintenance of attendance Register for candidates who have registered for the course. The teacher of the course must intimate the Head of the Department at least seven calendar days before the last instruction day in the semester about the attendance particulars of all students. Each student should earn 75% attendance in the courses of a particular semester failing which he or she will not be permitted to appear in the End-Semester Examinations. However, it shall be open to the authorities to grant exemption to a candidate who has failed to obtain the prescribed 75% attendance for valid reasons and such exemptions should not under any circumstance be granted for attendance below 65%.

Teaching Methodologies:

The classroom teaching would be through conventional lectures or power point presentations (PPT). The lecture would be such that the student should participate actively in the discussion. Student seminars would be conducted and scientific discussions would be arranged to improve their communicative skills. In the laboratory, instructions would be given for the experiments followed by demonstration and finally the students have to do the experiments individually.

Maximum Marks:

Maximum marks of a theory and practical paper shall be decided on the basis of their contact hours / per week. One teaching hour per week shall equal to one credit and carry 25 maximum marks. Therefore, 4 teaching hours/week having 4 credit points shall carry 100 maximum marks for each theory paper/course. While two contact hours per week for a laboratory or practical work shall be equal to one credit point. Therefore, 4 contact hours / week shall equal to 2 credit points and shall carry 50 maximum marks.

Assessment Pattern:

The assessment of the students shall be divided into two parts in which first part is continuous or mid-term or internal assessment (30% weightage of the maximum marks) and second part is semester or end-term or external assessment (70% weightage of the maximum marks).

(i) Continuous / Mid-Term / Internal Assessment:

- (a) The continuous or mid-term or internal assessment for each theory paper shall be taken by the faculty members in the Department during each semester. Internal assessment part is further divided in two parts of equal weightage of marks as per the details given below:

Continuous Assessment	Modes of Assessments		Max. Marks
	Collegiate (Regular) Students	Non-collegiate (Private) Students	

Cont. Assess-I	Written Examination	Report Writing	20
Cont. Assess-II	Seminar / Presentation / Project Report / Quiz / GD / Viva-voce	Viva-voce	10

Note: *In the Continuous/Mid-Term/Internal Assessment-I, written examination shall be of one hour duration for each theory paper and shall be taken according to the academic calendar which will be notified by the Department. Time duration for Continuous/Mid-Term/Internal Assessment-II is not allotted. It will be decided by the faculty member which will be taking second internal assessment.*

- (b) For practical papers, there will not be continuous or mid-term or internal assessment. There will be only one external or end-term or semester assessment having 100% weightage of maximum marks.
- (c) A student, who remains absent (defaulter) or fails or wants to improve the marks in the continuous or mid-term or internal assessment, may be permitted to appear in the desired paper(s) in same semester and one time only with the permission of the concern Head of the Department. Defaulter/improvement fee of Rupees 250/- per paper shall be taken from such candidates. Duly forwarded application of such student by the Head of the Department, who may permit the such candidates to appear in the continuous or mid-term or internal assessment after production of satisfactory evidence about the reason of his/her absence in the test(s) and deposition of the defaulter/improvement fee, shall be sent to the concerned teacher to take the continuous or mid-term or internal assessment of such candidates. A record of such candidates shall be kept in the Department.
- (d) Regular attendance of the student shall be considered in the internal assessment. Marks (equal to 10% of internal assessment) may be given to the student(s) for regularity who is/are taken classes regularly. If the attendance/regularity factor is similar for all the students, then weightage marks for regularity may be merged in the weightage of second internal assessment (seminar / presentation / assignment / dissertation / quiz / group discussion / viva-voce, etc.).
- (e) Paper wise consolidated marks for each theory paper and dissertation / seminar (i.e. total marks obtained during various modes of internal assessment) obtained by the students (out of the 30% weightage of the maximum marks of the each paper) shall be forwarded by the Head of the Department (in two copies) to the Controller of Examinations of the University within a week from the date of last internal assessment test for incorporation in the tabulation register.
- (f) The consolidated marks obtained by the students be also made known to them before being communicated by the concerned Head of the Department to the University for final incorporation in the tabulation register. If any discrepancies are discovered or pointed out by the students, the same shall be looked into by the concerned faculty member and corrections made, wherever necessary. The decision of the Head of the Department before the communication of marks to the University shall be final. No corrections shall be made in the internal assessment marks after the declaration of the result by the University.

- (g) Consolidated marks of internal assessment obtained out of the 30% weightage of maximum marks of each theory paper which will be communicated to the University shall be in whole number and not in fraction. Marks awarded for the various internal assessments in each paper shall be added up and then round off to the next whole number to avoid any fraction.
- (h) All test copies and other material related to the internal assessment shall also be sent to the Controller of Examinations of the University to keep in record as per the University guidelines.
- (i) The concerned Head of the Department shall be responsible for proper conduct of internal assessment tests and for communication of the consolidated marks to the University within the prescribed time.
- (j) The Head of the Department shall keep a record of the marks and also notify the same to the candidates immediately so that if any candidate is not satisfied with the award in any test or seasonal work, he / she should represent the matter to the higher authority.

(ii) Semester / End-Term / External Assessment:

- (a) The semester or end-term or external assessment (70% weightage of the maximum marks) shall be 03 hours duration to each theory paper and 06 hours duration for each practical paper and shall be taken by the University at the end of each semester.
- (b) The syllabus for each theory paper is divided into five independent units.

Question Paper Pattern:

(A) Continuous / Mid-Term / Internal Assessment:

30% weightage of Maximum Marks (30 Marks out of 100 Maximum Marks).

(i) Continuous / Mid-Term / Internal Assessment-I (Max. Marks: 20):

Department of

University / College :

Address

First Internal Assessment Test 20... - 20....

(Written Examination)

Name of Class/Course :	Max. Marks : 20 Marks
Name of Semester :	Duration of Exam. : 1.00 Hr
No. & Name of Paper :	Date of Exam. :

Q. No. 1. 05 Marks
or
.....

Q. No. 2. 05 Marks
or
.....

Q. No. 3. 05 Marks
or
.....

Q. No. 4. 05 Marks
or
.....

(ii) Continuous / Mid-Term / Internal Assessment-II (Max. Marks: 10):

Department of

University / College:

Address

Second Internal Assessment Test 20... - 20....

(Seminar / Presentation / Project Report / Quiz / GD / Viva-voce)

Name of Class/Course:	Max. Marks : 10 Marks
Name of Semester :	Mode of Assessment:
No. & Name of Paper:	Date of Assessment:

**Format for Compilation of Marks/Awards of
Continuous/Mid-Term/Internal Assessment-I & II**

Department of

University / College:

Address

Name of Class/Course:

Name of Semester :

No. & Name of Paper:

Max. Marks :

S. No.	Name of Student	Father's Name	Marks Obtained			
			Internal Assess. - I	Internal Assess. - II	Total Marks (In Figure)	Total Marks (In Words)
1.						

Name & Signature of the Faculty Member

(B) Semester / End-Term / External / Assessment:

70% weightage of Maximum Marks (70 Marks out of 100 Maximum Marks).

Question Paper Pattern for Semester Examination

[Common for Collegiate (Regular) and Non-collegiate (Private) Students]

Duration of Examination: 3 Hours

Max. Marks: 70

Note: The syllabus is divided into five independent units and question paper will be divided into following two sections:

- **Section-A** will carry one compulsory question comprising 10 short answer type questions (answer about in 10-20 words) by taking two questions from each unit with no internal choice. Each short answer type question will have 2 marks and hence Section-A will carry total 20 marks.
- **Section-B** will carry 50 marks equally divided into five long answer type questions (answer about in 400-500 words) with one question from each unit with internal choice (another question will be given in option or question may be divided in to sub-divisions). Paper setter shall be advised to set one question from each unit along with one option of each question and students are instructed to attempt total five questions by selecting one question from each unit. Each long answer type question will have 10 marks and hence Section-B will carry total 50 marks.

Section-A

Q. No. 1: Comprising 10 Short Answer Type Questions

Unit-I

- | | | |
|------|-------|----------|
| (i) | | 02 Marks |
| (ii) | | 02 Marks |

Unit-II

- | | | |
|-------|-------|----------|
| (iii) | | 02 Marks |

Practical Examinations:

Continuous / Mid-Term / Internal Assessment:

Not applicable in Practical Examinations.

Semester / End-Term / External Assessment:

Common for Collegiate (Regular) and Non-collegiate (Private) Students

Duration of Exam: 6 Hours

Maximum Marks: 50

Distribution of Maximum Marks:

S. No.	Name of Exercise	Marks
1.	Exercise-1	15
2.	Exercise-2	15
3.	Practical Record	10
4.	Viva-voce	10
Total Marks		50

Minimum Pass Marks and Rules regarding Determination of Results:

Each semester shall be regarded as a unit for working out the result of the candidates. The result of each semester examination shall be worked out separately (even if he/she has appeared at the paper of the lower semester along with the papers of higher semester) in accordance with the following conditions:

- a) The candidate shall be declared as pass in a semester examination, if he/she secures at least 40% marks in each theory paper separately in continuous/internal and semester / external examinations and 50% marks in each practical paper/project/dissertation with 40% aggregate marks in that semester.
- b) A candidate declared as fail/absent in one or more papers at any odd semester examination shall be permitted to take admission in the next higher semester (even semester) of the same academic session.
- c) A candidate may be promoted in the next academic session (odd semester), if he/she has cleared collectively at least 50% of the papers of both semesters of previous academic session. The candidate who does not fulfill the above condition will remain as an ex-student and will re-appear in the due papers' examinations along with next odd/even semester examinations.
- d) If any student who is provisionally admitted in higher odd semester but could not secure prescribed minimum marks in previous semesters will be treated as ex-student and his/her admission fee will be carry forwarded to the next odd semester of forthcoming academic session.

- e) If a candidate, who is declared as pass, wants to improve his/her performance in the theory papers of just previous semester, he/she may re-appear only one time in these theory papers in next odd/even semester examinations.
- f) Candidate shall not be permitted to re-appear or improve the marks obtained in the external examination of practical/dissertation in any condition.
- g) If the number of papers prescribed in a semester examination is an odd number, it shall be increased by one for the purpose of reckoning 50% of the papers for considering the student pass/fail.
- h) A candidate may be given only two additional chances for passing the semester thus maximum tenure for completing for three years undergraduate programme up to five years and so on.
- i) The marks secured in the General Hindi, General English, Computer Applications and Environment Science shall be counted in awarding the division to a candidate as per the University act and ordinances.
- j) The grace marks scheme shall be applicable as per the University norms.

Classification of Successful Candidates:

- (a) Each student shall be awarded a final letter grade at the end of the semester of the particular course. The letter grades and their corresponding grade points are given as:

Percentage of Marks Obtained	Performance	Grade Letter	Grade Point
90.00 – 100.00	Outstanding	O	10
80.00 – 89.99	Excellent	A ⁺	9
70.00 – 79.99	Very Good	A	8
60.00 – 69.99	Good	B ⁺	7
50.00 – 59.99	Above Average	B	6
45.00 – 49.99	Average	C	5
40.00 – 45.99	Below Average / Pass	P	4
00.00 – 39.99	Fail	F	0
--	Absent	AB	0
--	Unfair Means	UM	0
--	Withdrawn	W	0

- (b) A candidate who remains absent for any semester examination shall be assigned a letter grade AB along with corresponding grade point zero. He/she will have to re-appear for the said examination in due paper/course.
- (c) Semester Grade Point Average (SGPA): Performance of a student in a semester is indicated by a number called 'Semester Grade Point Average' (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five papers (theory/practical) in a semester with credits C₁, C₂, C₃, C₄ and C₅ and the student's grade points in these courses are P₁, P₂, P₃, P₄ and P₅ respectively, then students' SGPA is calculated as:

$$SGPA = \frac{C_1P_1 + C_2P_2 + C_3P_3 + C_4P_4 + C_5P_5}{C_1 + C_2 + C_3 + C_4 + C_5} = \frac{\sum_{i=1}^n C_i P_i}{\sum_{i=1}^n C_i}$$

Where:

C_i : Number of credits earned in the i^{th} paper/course of semester for which SGPA is to be calculated.

P_i : Grade point earned in i^{th} paper/course.

$i = 1, 2, 3, 4, \dots, n$: Represents the number of papers/courses in which a student has appeared in End of Semester Evaluation (EoSE).

The SGPA is calculated, as per example given below, up to two decimal points:

Paper/Course	Credit (C)	Grade Letter	Grade Point (P)	Credit Point (CP)	SGPA
Physics	4	A	8	4 x 8 = 32	$\begin{aligned} &\Sigma CP \\ &= \frac{\quad}{\Sigma C} \\ &= \frac{146}{20} \\ &= 7.30 \end{aligned}$
Physics Practical	2	B ⁺	7	2 x 7 = 14	
Mathematics-I	4	A	8	4 x 8 = 32	
Mathematics Practical-I	2	B ⁺	7	2 x 7 = 14	
Physics Hons	4	A	8	4 x 8 = 32	
Physics Hons Practical	2	B	6	2 x 6 = 12	
General Hindi/English	2	C	5	2 x 5 = 10	
Total	20	--	--	146	

It should be noted that, the SGPA for any semester shall take into consideration the F and AB grade awarded in that semester. For example, if a student has a F or AB grade in paper/course 4, the SGPA shall then be computed as:

$$SGPA = \frac{C_1P_1 + C_2P_2 + C_3P_3 + C_4 \times \text{ZERO} + C_5P_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

- (d) **Cumulative Grade Point Average (CGPA):** The CGPA is calculated with the SGPA of all the semesters up to two decimal points and is indicated in final grade report card / final transcript showing the grades of all the semesters and their papers/courses. The CGPA shall reflect the failed status in case of F grade(s), till the paper(s)/course(s) is/are passed. When the paper(s)/course(s) is/are passed by obtaining a pass grade on subsequent examination(s), the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$CGPA = \frac{C_1S_1 + C_2S_2 + C_3S_3 + C_4S_4 + C_5S_5 + C_6S_6}{C_1 + C_2 + C_3 + C_4 + C_5 + C_6} = \frac{\sum_{i=1}^n C_i S_i}{\sum_{i=1}^n C_i}$$

Where:

$C_1, C_2, C_3, \dots$ is the total number of credits for I, II, III, ... Semesters and $S_1, S_2, S_3, \dots$ is the SGPA of I, II, III, ... Semesters.

The CGPA is calculated, as per example given below, up to two decimal points:

Semester	Credit (C)	SGPA	C x SGPA (CS)	CGPA
Semester-I	20	7.30	20 x 7.30 = 146.0	ΣCS = ----- ΣC 925.80 = ----- 120 = 7.71
Semester-II	20	7.69	20 x 7.69 = 153.8	
Semester-III	20	7.23	20 x 7.23 = 144.6	
Semester-IV	20	7.86	20 x 7.86 = 157.2	
Semester-V	20	8.12	20 x 8.12 = 162.4	
Semester-VI	20	8.09	20 x 8.09 = 161.8	
Total	120	--	925.80	

- (e) The classification of successful candidates after last semester examination shall be as under:

Description of Marks Obtained	Division / Result
75% and above marks in a paper.	Distinction in that paper
A candidate who has secured aggregate 60% and above marks	First Division
A candidate who has secured aggregate 50% and above but less than 60% marks	Second Division
A candidate who has secured aggregate 40% and above but less than 50% marks	Pass

V SEMESTER

5.5-Digital Electronics

Unit 1

Logic Gates : Logic Gates and Boolean Algebra Representation and Simplification of functions by Karnaugh Maps. Combinational Circuits design. Combinational circuits - adder, subtractor, decoder, demultiplexer, encoder, multiplexer, comparator.

Unit 2

Sequential Logic Circuit & Design-flip flop, shift register, asynchronous and synchronous counters, Digital Logic Families and Their Characteristics : RTL, DTL, TTL, Schottky TTL, ECL, MOS and CMOS, Fan in, Fan out.

Unit 3

Semiconductor Memories : RAM, ROM, PROM, EPROM, BJTRAM Cell, MOS RAM Cell, Organization of RAM, Charge Coupled devices (CCD), storage of charge and transfer of charge in CCD.

Unit 4

D/A Converter : Weighted resistance D/A, R-2R Ladder Converter. DAC 0800 D/A Chip, D/A Converter specification.

Unit 5

A/D Converter : Analog to Digital Converter, Parallel Comparator Converter, Counting Converter, Successive Approximation Converter, Dual Slope converter A/D converter specification, sampling and hold circuit, ADC 0804 Converter chip.

Text/Reference Books:

1. Digital Principles and Applications by C. P. Malvino and D. P. Leach, Mc-Graw Hill, 1985.
2. Digital logic and computer design by M. M. Mano, Tata Mc-Graw Hill.
3. Digital Integrated Circuits by Taub and Shilling, Tata Mc-Graw Hill
4. Computer Architecture and Organization by J. P. Hayes, Mc-Graw Hill 1988.
5. Digital Fundamentals by Floyd, Mc-Graw Hill.
6. Digital Ic by K. R. Botkar, Mc-Graw Hill.

5.6-PHYSICS HONS PRACTICAL

1. Determine the electric charge (e/m) using Millikan's oil drop method.
2. Determine the specific charge (e/m) using Thomson method.
3. Determine the specific charge (e/m) using helical method.
4. To verify the truth table of various logic gates (AND, OR, NOT, NOR, NAND, XOR)
5. Verify the various theorems of Boolean algebra and De Morgan's theorem.
6. Implement the Boolean expression and verify the truth table.
7. Study the various combinational circuits-Half Adder, Half subtractor, Full Adder, Full subtractor, Parity Generator, Parity Checker.
8. Study the advanced combination circuits-Multiplexer, Demultiplexer, Encoder, Decoder.
9. Study the various code converters & verify the truth table-Binary to BCD converter, Binary to Gray codes and Binary to EX-3.

10. Study the flip flops and verify the truth table-R-S,D,J-K, T, Master slave, flip-flop-Serial in Serial out, Serial in Parallel out, Parallel in Parallel out, Parallel in Serial out.
11. Study the various asynchronous /synchronous counters using flip-flop-Binary up, Binary down, Mod-10 .
12. Study the special counters-Ring counter and Twisted ring counter (Johnson counter).
13. To study the A/D converter and also calculate resolution & error percentage.
14. To study the D/A converter and also calculate resolution & error percentage.
15. To Study an Astable Multivibrator using 555 Timer.
16. To Study the Bistable Multivibrator using 555 Timer.
17. To Study the Monostable Multivibrator using 555 Timer.
18. Any other experiments of the equivalent standard can be set.

VI SEMESTER

6.5-Solid State Physics

Unit 1

Crystal structure : Symmetry elements in crystal, fundamental lattice systems and types, Miller indices and direction indices, Spacing of planes in Crystal Lattice, crystal structures of simple cubic, Face centered cubic structure, Body centered cubic structure, Hexagonal closed packed structure, diamond and Zinc blend structure, Pervoskite structure, reciprocal lattice, Brillouin zones.

Unit 2

Crystal bonding, ionic bond, binding energy of ionic crystal, determination of the repulsive exponent, covalent bonding, metallic bonding, molecular or Vander Waal's bonding, hydrogen bonding, Crystal Diffraction: Bragg's law, X-ray and neutron diffraction, rotating crystal and powder methods, Lave equation.

Unit 3

Electrical and Thermal Properties of Solids: Phonon, Lattice Specific heat, Various theories of specific heat – Classical theory, Einstein's theory and theory, Quantum theory of electrical and Thermal conductivity, Weidmann-Franz law, light propagation in conducting media, Fermi Dirac distribution function, density of states.

Unit 4

Semiconductor, Law of mass action, Calculation of impurity conductivity, Introduction of band structure, Ellipsoidal energy surfaces in Si and Ge, Hall effect, recombination mechanism, Shockley Read theory, excitons, photoconductivity, photo luminescence.

Unit 5

Band theory of solids: Formation of bands, Wave Function in a periodic lattice and Bloch theorem, Kronig Penny Model, Effective mass of an electron moving in a crystal, Physical origin of effective mass, difference between conductors, insulators, semiconductors.

2. Introduction to Solid state Physics by C. Kittel, (John Wiley), VII Ed.,1995.
3. Solid State Physics by A. J. Dekker, (Macmilam), London, 1965.
4. Solid state physics by S. O. Pillai, (New Age International Publishers), 2005.
6. Intermediate Quantum theory of solids- A.D.E.Animalu,(Prentice Hall).

6.6-PHYSICS HONS PRACTICAL

1. Determine the value of Plank's constant using photocell.
2. Determine the value of Plank's constant using solar cell.
3. Work function of Tungsten, Richardson's equation.
4. Study the absorption spectrum of iodine molecule.
5. Study the Franck Hertz experiment and determine the ionization potential of inert gas.
6. Study the hyperfine structure of spectral lines and Zeeman effect by constant deviation spectrograph.
7. Determine hall voltage, mobility, carrier concentration and hall coefficient in a given semiconductor.

8. Determine the band gap in a semiconductor using four-probe method.
9. Determine the magnetic susceptibility of a paramagnetic salt by Quinck's method.
10. Determine the power factor of a coil using CRO.
11. Determine hysteresis loss using CRO.
12. Study the dynamics of a lattice using electrical analogue.
13. Study the characteristics of a G.M counter and verify the inverse square law.
14. Study of β - absorption in aluminium foil using G.M counter.
15. Determine the g- factor by ESR- step up.
16. Study of variation of modulus of rigidity of a given specimen as a function of temperature.
17. Any other experiments of the equivalent standard can be set.
