

UNIVERSITY OF KOTA, KOTA
BACHELOR OF COMPUTER APPLICATION (BCA) Exam.
2023-24
(Course Code 5450)

(Applicable for students admitted in Session 2023-24)

1. **Eligibility:** The basic eligibility for admission to the course is 10+2 in any discipline with minimum 48% marks, 5% relaxation in marks will be given to the SC /ST/OBC (except creamy layer) / SOBC / PH candidates. The admission in the course is based on merit of XII class. Reservation policy will be applicable as per the state government rules.
2. **Selection:** Based on merit in qualifying examination.

1. Scheme of Instruction:

Each Semester shall be of five months (90 working days) duration. Details of lecture hours per week shall be as follows:

Theory: Three hours/week for each Paper

Practical: Students are required to work in the Laboratory for 4 hours per week for each practical under faculty guidance.

2. Paper Pattern for BCA Theory Papers

Section	70 Marks External Paper (4 Credits)	100 Marks External Paper (6 Credits)
Section-A	There will be one question with 10 parts having two parts from each unit with no internal choice. The weight age of each part is 2 marks hence the total weightage of this section is 20 marks (10x2).	There will be one question with 10 parts having two parts from each unit with no internal choice. The weightage of each part is 2 marks hence the total weightage of this section is 20 marks (20x1).
Section-B	There will be five questions with one question from each unit with internal choice (may have subdivisions). The weight of each question of 10 marks hence the total weightage of the section is 50 marks (10x5).	There will be five questions with one question from each unit with internal choice (may have subdivisions). The weight of each question of 16 marks hence the total weightage of the section is 80 marks (16x5).

Theory:

1. **Assignments/ Presentation** 40% of the internal assessment marks for each theory paper will be awarded on the basis of performance in the assignments or presentations regularly given to the students ,and its records.
2. **Internal Examination:** 40% of the total Internal Assessment marks for each theory paper will be awarded on the basis of performance in written examination conducted by the faculty, one at the end of Second month and another at the end of fourth month.
3. **Seminar/Oral examination:** 10 % of the total internal assessment marks for each paper will be awarded on the basis of performance either in a seminar or internal viva-voce.
4. **Overall performance:** 10% of the total internal assessment marks will be awarded for each paper on the basis of performance and conduct in the classroom.

Practical:

1. Project: 80% of the total Internal Assessment Marks for each practical paper during I & II year will be awarded on the basis of project, its presentation and project report submitted by the students. This activity can be held in the team of maximum two students. There should be a project co-coordinator (faculty member of computer science department).
2. Internal examination: 10 % of the total Internal Assessment marks for each practical paper during I& II year will be awarded on the basis of performance in practical examination conducted by the faculty, once during the session. In III year it will be 80%.
3. Overall performance:
10% of the total internal assessment marks will be awarded during I& II year for each practical paper on the basis of performance and conduct of the student in the practical lab. In III year it will be 20%

Note: Detailed breakup of Internal Marks awarded as per above guidelines must be submitted to the university in a tabular format for each paper. Department/College must preserve answer books of internal examination for a period one year from the date of examination and must be presented to the university as and when required.

- A. I division with distinction: 80% or more marks in the aggregate provided the candidate has passed all the papers and examinations in the first attempt.
- B. I division: 60% or more marks but fails to satisfy the criteria for being classified as first division with distinction laid in (a).
- C. II division: All other than those included in (a) and (b) above i.e. $< 60\%$ and $\geq 50\%$.
- D. Passing criteria is as per university ordinance. A candidate must pass the examinations within five years of the initial admission to the first year of the course.

COURSE OBJECTIVE

The objectives of BCA course are:

- To provide strong foundation in field of Computer Science and Applications.
- To prepare the students with exceptional skills of problem solving, communication and leadership skills.
- To facilitate overall understanding of the requirements of the subjects.
- To prepare the students to provide professional solutions to real time problems.
- To train future industry professionals.
- To impart comprehensive knowledge with equal emphasis on theory and practice.
- To keep the students up-to-speed on all the latest and cutting edge technologies.

PROGRAMME OUTCOME

- Acquire Knowledge of Computer Science, applications, theory and algorithm principles in the design and implementing computer based system.
- To provide thorough understanding of nature, scope and application of computer and computer languages.
- To develop interdisciplinary approach among the students.
- Exhibit clarity on both conceptual and application-oriented skills of Computing, programming for higher studies in Post Graduate programs.
- To Work in the IT sector as system analyst, software developer, web developer, software tester, network administrator, system administrator etc.
- To enhance the skills for working in public sector and Government organizations.
- For providing Technical skill based Education in Schools and Colleges.
- Student will able to know various issues, latest trends in technology development and thereby innovate new ideas and solutions to existing problems.

BCA SEMESTER WISE SCHEME

First Year

+	Serial Number, Code & Nomenclature of Paper			Duration of Exam	Teaching Hrs/ Week & Credit			Distribution of Marks			Min Pass Marks	
	Year / Semester	Subject Code	Course Type		Nomenclature	L	P	C	Internal	Sem. Assess.	Total Marks	Internal Assess.
I Year I Sem.	BCA 1001 T	DCC	Subject-I: Theory-I Introduction of Information Technology	3Hrs	6	...	6	50	100	150	20	40
	BCA 1002 T	DCC	Subject-II: Theory-I: Problem Solving Through C-Programming	3Hrs	4	...	4	30	70	100	12	28
	BCA 1002 P	DCC	Subject-II: Practical-I: Lab on Problem Solving Through C-Programming	3Hrs	...	4	2	...	50	50	...	25
	BCA 1003 T	DCC	Subject-III: Theory-I: PC Software Package	3Hrs	4	...	4	30	70	100	12	28
	BCA 1003 P	DCC	Subject-III: Practical-I: Lab on PC Software Package	3Hrs	...	4	2	...	50	50	...	25
	BCA 1004 T	AEC	Hindi/English	1.5 Hrs	2	--	2	---	50	50	--	20
Semester Total					16	8	20	110	390	500	--	
I Year II Sem.	BCA 2001 T	DCC	Subject-I: Theory-I Basic Maths	3Hrs	6	...	6	50	100	150	20	40
	BCA 2002 T	DCC	Subject-II: Theory-I D.B.M.S	3Hrs	4	...	4	30	70	100	12	28
	BCA 2002 P	DCC	Subject-II: Practical-I D.B.M.S Lab	3Hrs	...	4	2	...	50	50	...	25
	BCA 2003 T	DCC	Subject-III: Theory-I: D.C.C. N	3Hrs	4	...	4	30	70	100	12	28
	BCA 200P	DCC	Subject-III: Practical-I D.C.C.N Lab	3Hrs	...	4	2	...	50	50	...	25

	Semester Total				14	12	20	90	410	500	--	
	Second year Total				32	16	40	200	800	1000	--	

THIRD YEAR

+	Serial Number, Code & Nomenclature of Paper			Duration of Exam	Teaching Hrs/ Week & Credit			Distribution of Marks			Min Pass Marks		
	Year / Semester	Subject Type	Course Type		Nomenclature	L	P	C	Internal Assess.	Sem. Assess.	Total Marks	Internal Assess.	Sem. Assess.
III Year V Sem.	BCA 5001T	DSE	Subject-I: Elective: E-Commerce		3Hrs	6	...	6	50	100	150	20	40
	BCA 5002T		Subject-I: Elective: MIS										
	BCA 5003T	DSE	Subject-II: Elective: Web Technology		3Hrs	4	...	4	30	70	100	12	28
	BCA 5004T		Subject-II: Elective: Programing With PHP										
	BCA 5003P	DSE	Subject-II: Elective Practical		3Hrs	...	4	2	...	50	50	...	25
	BCA 5004P												
	BCA 5005T	DSE	Subject-III: Elective: Cyber Security		3Hrs	4		4	30	70	100	12	28
	BCA 5006T		Subject-III: Elective: Information Security										
	BCA 5005P	DSE	Subject-III: Elective Practical		3Hrs	...	4	2	...	50	50	...	25
	BCA 5006P												
	BCA 5007T	VAC	Mulya Pravah		1.5 Hrs	2	--	2	---	50	50	--	20
Semester Total					16	8	20	110	390	500	--		
III Year VI Sem.	BCA 6001T	DSE	Subject-I: Elective: Artificial Intelligence		3Hrs	6	--	6	50	100	150	20	40
	BCA 6002T		Subject-I: Elective: Data Science										
	BCA 6003T	DSE	Subject-II: Elective: Cloud Computing		3Hrs	4	--	4	30	70	100	12	28
	BCA 6004T		Subject-II: Elective: Data Warehousing										
	BCA 6003P	DSE	Subject-II: Elective: Practical		3Hrs	--	4	2	--	50	50	--	25
	BCA 6004P												
	BCA 6005P	DSE	Major Project		3Hrs		12	6	50	100	150	20	40
	BCA 6006T	SEC			1.5 Hrs	2	--	2	---	50	50	--	20
Semester Total					12	16	20	130	370	500	--		
Third year Total					28	24	40	240	760	1000			
Three Year Degree Total					92	56	120	660	2340	3000			

EXAMINATION AND ASSESSMENT

Each UG semester is proposed to have maximum 20 credit (500 marks) approach and out of which each subject will be given 6 credits (150 marks) and remaining 2 credits (50 marks) in each semester will be assigned to AEC/GET/VAC/SEC. The subject of pure theoretical nature will have one theory paper in each semester of 6 credits (150 marks) While the subject of hybrid nature (theory) and practical component both) will have 4 credits (100 Marks) for one theory paper and 2 credit (50 marks) for one practical. The structure of a UG program (except B.Ed) upto the three year degree is as under :

Part /Year	Semester	Max. Marks	Semester Total Credits	DCC and DSE Credits	GEC/AEC/VAC/SEC Credits	Subject I Credit	Subject II Credit	Subject-III Credit	Subject-IV Credits
First	I	500	20	18	02	04	04	04	06
	II	500	20	18	02	04	04	04	06
Second	III	500	20	18	02	04	04	04	06
	IV	500	20	18	02	04	04	04	06
Third	V	500	20	18	02	04	04	04	06
	VI	500	20	18	02	04	04	04	06
Total		3000	120	108	12	24	24	24	36

There are two category of the each paper for the evaluation i.e. 100 (4 credits and 150 (6 credits) marks for theory with practical component and theory without the practical component, respectively. The continuous evaluation of theory paper which has the practical component will be of 30 marks and the remaining 70 marks will be devoted to external evaluation. Similarly, the continuous assessment of theory paper which does not have the practical component will be of 50 marks and the remaining 100 marks will be devoted to external evaluation. The distribution of marks for continuous and external assessment is proposed as under:

Continuous Assessment Weightage			External Assessment Weightage		Total Marks(Total Credit)
Regular Students		Total	Paper based External Evaluation(End term Examination)		
Mid-Term	Seminar/project report/presentation				
20	10		30	70	100(04)
30	20		50	100	150(06)

i.e. the 30 /50 marks of continuous assessment for practical/ non-practical subject will have a mid-term test of 20/30 marks and remaining 10/20 marks will be devoted to seminar/ project report/ presentation.

The student has to pass internal and external exam separately in theory as well as practical papers. Minimum passing percentage in Theory papers will be 40 % (internal and external separately) and 50 % in Practical.

Teaching Load

Theory 1 Credit = 15 Theory periods of one-hour duration in entire semester (i.e. one hour per week)

Practical 1 Credit = 30 periods of one-hour duration in entire semester (i.e. two hour per week)

BCA I YEAR(I Sem.)
Introduction to Information Technology

Time: 3Hrs.

Max. Marks:150

Min Pass: 60

UNIT-I

Computer Basics: A Simple Model of a Computer, Characteristics of Computers, Problem-solving Using Computers, Algorithms. Generations and classification of Computers.

Input & Output Devices: Description of Input Units, Other Input Methods, Output Units.

UNIT-II

Data Representation: Representation of Characters in computers, Representation of Integers, Representation of Fractions, Hexadecimal Representation of Numbers, Decimal to Binary Conversion, Error-detecting codes.

Software Concepts: Types of Software, Software: Qualities & Attributes, Programming Languages: types and differences

UNIT-III

Computer Memory: Memory Cell, Memory Organization, Read Only Memory, Serial Access Memory, Physical Devices Used to Construct Memories, Magnetic Hard Disk, floppy Disk Drives, Compact Disk, Read Only Memory, Magnetic Tape Drives.

UNIT-IV

Binary Arithmetic: Binary Addition, Binary Subtraction, Signed Numbers, Two's Complement Representation of Numbers, Addition/Subtraction of Numbers in 2's Complement Notation, Binary Multiplication, Binary Division, Floating Point Representation of Numbers, Arithmetic Operations with Normalized Floating Point Numbers.

UNIT-V

Internet: Network, World Wide Web, Uniform Resource Locator, Web Browsers, IP Address, Domain Name, Internet Service Providers, Introduction to Internet Security, Internet Requirements, Web Search Engine, Net Surfing, Internet Services, Intranet and Extranet, how to connect with internet.

Text /ReferenceBooks

1. "Computer fundamental ", P.K.Sinha BPB Publications.
2. Fundamentals of Computers, V.Rajaraman, 3rd Edition, PHI Publications
3. Essentials of Computer & Network Technology, Nasib S. Gill, Khanna Publications.
4. Fundamentals of Information Technology, Deepak Bharihoke, Excel Books. 2007.
5. Information Technology by Reena Dadhich and R.C.Poonia, Vardhman Publications, 2009.

Problem Solving through C Programming (BCA1002T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

UNIT- I

Algorithm and algorithm development: Definition and properties of algorithm, flow chart symbols, example of simple algorithms. Program design, errors: syntax error and semantic error, debugging, program verification, testing, documentation and maintenance.

UNIT- II

Variable names, data type and sizes, constants, declarations, arithmetic operators, relational and logical operators, type conversions, increment and decrement operators, bitwise operators, assignment operators and expressions, precedence and order of evaluation, standard input and output statements.

UNIT- III

Control Flow: Statements and blocks, if-else, nested if, switch, looping statement: while, for, do-while, break and continue, go-to and labels.

Arrays : declarations, integer and character array, reading and writing an array, one and two dimensional array, operations on arrays.

UNIT – IV

Functions and Program Structure: Basics of function, function definition and declaration, external variables, scope rules, header files, static variables, register variables, block structure, initialization, recursion, the C preprocessor.

UNIT - V

Pointer : Pointers and addresses, pointers and function arguments, address arithmetic. Character pointers, pointers to pointers, Pointers to functions.

Structures: Basics of structures, structures and functions, arrays of structures, pointers to structures, self- referential structures, typedef, unions.

PC Software Packages (BCA1003T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

UNIT – I

DOS: Introduction, history & versions of DOS, DOS basics- Physical structure of disk, drive name, FAT, file & directory structure and naming rules, booting process, DOS system files, DOS commands: internal & external.

UNIT – II

GUI Based OS: Concepts, Features, Structure, Desktop, Taskbar, Start Menu, My Computer, Recycle Bin, Accessories- Calculator, Notepad, Paint, Word-pad, Character Map, Explorer, Entertainment, Managing Hardware & Software- Installation of Hardware & Software, Using Scanner, System Tools, Communication, Sharing Information between programs.

UNIT – III

Word Processing: Features, Creating, Saving and Opening Documents in Word, Interface, Toolbars, Ruler, Menus, Keyboard Shortcut, Editing, Previewing, Printing & Formatting a Document, Advanced Features of MS Word, Find & Replace, Using Thesaurus, Using Auto- Multiple Functions, Mail Merge, Handling Graphics, Tables & Charts, Converting a word document into various formats like- Text, Rich Text format, Word perfect, HTML etc.

UNIT – IV

Worksheet: Worksheet basics, creating worksheet, entering into worksheet, heading information, data, text, dates, alphanumeric values, saving & quitting worksheet, Opening and moving around in an existing worksheet, Toolbars and Menus, Keyboard shortcuts, Working with single and multiple workbook, working with formulae & cell referencing, Auto sum, Copying formulae, Absolute & relative addressing, Worksheet with ranges, formatting of worksheet, Previewing & Printing worksheet, Graphs and charts, Database, Creating and Using macros, Multiple worksheets- concepts, creating and using.

UNIT – V

Introduction to Power Point: Creating slide show with animations, Designing Presentations.

Case Study of web editing tool and DBMS tool such as: Front Page, Ms-Access Creating & using databases in Access.

6. Ms Office XP Computer, BPB Publications.

I Year (II Sem)

Basic Mathematics (BCA2001T)

Time: 3 Hrs.

Max. Marks: 100
Min Pass: 60

UNIT - I

Sequences and Series: AP, GP and HP, Arithmetic–Geometric- Harmonic means between two numbers (excluding Arithmetic- Geometric series).

Logarithms: definition, Laws regarding product, quotient, exponent and change of base.

UNIT – II

SETS: Sets, subsets, equal sets, null set, universal set, finite & infinite sets, open & closed sets etc., operations on

Sets, partition of sets, Cartesian product.

UNIT - III

RELATIONS AND FUNCTIONS: relation, properties of relations, equivalence relation, equivalence relation with partition , partial order relation, pigeonhole principle, function, domain and range, onto, into and one-to-one functions, composite functions, inverse functions.

UNIT – IV

DIFFERENTIATION: Derivative, derivatives of sum, differences, product & quotients, derivatives of composite functions, logarithmic differentiation, mean value theorem, expansion of functions,

UNIT - V

Basic concepts of Graph Theory: Vertices, edges, degree, paths, circuits, cycles, complete graphs and trees. Multi-graphs, weighted graphs and directed graphs, Adjacency matrix of a graphs. Connected and disconnected graphs.

Database Management System (BCA2002T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit –I

Introduction : Purpose of the data base system, data abstraction, data model, data independence, data definition language, data manipulation language, data base administrator, data base users, overall structure.

Unit –II

ER Model : entities, mapping constrains, keys, E-R diagram, reducing E-R diagrams to tables, generation,aggregation, design of an E-R database scheme.

Unit –III

Relational Model : The catalog, base tables and views. Relational Data Objects - Domains and Relations: Domains, relations, kinds of relations, relations and predicates, relational databases.

Relational Data Integrity - Candidate keys and related matters: Candidate keys. Primary and alternate keys. Foreign keys, foreign key rules, nulls. Candidate keys and nulls, foreign key and nulls.

Unit –IV

The SQL Language: Data definition, retrieval and update operations. Table expressions, conditionalexpressions, embedded SQL.

Views: Introduction, what are views for, data definition, data manipulation, SQL support.

Unit –V

File and system structure : overall system structure, file organisation, logical and physical file organization, sequential and random, hierarchical, inverted, multi list, indexing and hashing, B-tree index files.

Data Communication and Computer Networking (BCA2003T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit - I

Components of a data communication system, model of a data communication, data transmission concepts, digital and analog transmission, serial/parallel data transmission, signal encoding techniques, modulation and modems.

Unit – II

Guided and unguided transmission media, Transmission impairments, channel capacity, baud rate, bandwidth, multiplexing techniques, synchronous and asynchronous transmission, simplex, half duplex and full duplex transmission.

Unit – III

Circuit switching, Packet switching and Message switching, Connection oriented and Connection less services, Computer Networks Topologies, networks Classification by their Geography

Unit – IV

ISO-OSI model of networking, different layers and their functions, networking and Internetworking, Services gateways, bridges, repeaters, routers, Introduction to ISDN, DSL, Difference between OSI & TCP/IP model.

Unit - V

Introduction to Internet applications like DNS, FTP, SMTP, SNMP, WWW, HTTP, URL, E-mail, Teleconferencing & Electronic Banking, What is IP & IPv4 vs IPv6, What is USB & Difference between USB 2.0 and USB 3.0 .

Reference Books

BCA II YEAR (III SEM)

DATA STRUCTURES (BCA3001T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Introduction: structure and problem solving, algorithmic notation, Data Structure, Algorithms and sub algorithms, introduction to algorithm analysis for time and space

Unit II

Primitive and non primitive data structure concept, representation and manipulation of strings, concept and terminology for non primitive data structure, concept of arrays, stacks, queues. Basic operations on arrays, stacks & queues.

Unit III

Linear data structures and their linked storage representation: pointers and linked allocation, linked linear list, singly linked list, application of linked linear lists.

Unit IV

Non Linear data structure: Trees, types of trees, Graphs and their representations, applications of graph.

Unit V

Sorting and searching: concept of sorting and searching, selection sort, bubble sort, merge sort, binary search

Digital Electronics (BCA3002T)

Time: 3 Hrs.

Max. Marks: 150

Min Pass: 60

Unit-I

Number System and Codes: Decimal, Binary, Hexadecimal, Octal, BCD, Conversions, Complements (1's and 2's), Signed and Unsigned numbers, Addition and Subtraction, Multiplication, Gray and Hamming Codes.

Unit-II

Logic Gates and Boolean Algebra: Truth Tables, OR, AND, NOT, XOR, Universal (NOR and NAND) Gates, Boolean Theorems, DeMorgan's Theorems.

Unit-III

Combinational Logic Analysis and Design: Standard representation of logic functions (SOP and POS), Minimization Techniques (Karnaugh Map Method: up to 4 variables). Multiplexers (2:1,4:1) and Demultiplexers (1:2,4:1), Adder (half and full) and their use as subtractor, Encoder (8-line-to-3-line) and Decoder (3-line-to-8-line), Code Converters (Binary to BCD and vice versa).

Unit-IV

Sequential logic design: Latch, Flip flop, S-R FF, J-K FF, T and D type FFs, Clocked FFs, Registers, Counters (ripple, synchronous and asynchronous, ring, modulus), State Table, State Diagrams and Sequential Machines.

Unit- V

A/D and D/A converters: D/A conversions – Weighted-Register D/A converter, R-2R ladder D/A converter, A/D conversions-Counter type method using D/A, dual slope integrator method, successive approximation method, simultaneous method.

OR

Instruction Execution Cycle, ALU, Addressing Techniques.

Python Programming (BCA3003T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Introduction to Python: Python variables, Python basic Operators, Understanding python blocks. Python Data Types, Declaring and using Numeric data types: int, float etc.

Unit II

Python Program Flow Control Conditional blocks: if, else and else if, Simple for loops in python, For loop using ranges, string, list and dictionaries. Use of while loops in python, Loop manipulation using pass, continue, break and else. Programming using Python conditional and loop blocks.

Unit III

Python Complex data types: Using string data type and string operations, Defining list and list slicing, Use of Tuple data type. String, List and Dictionary, Manipulations Building blocks of python programs, string manipulation methods, List manipulation. Dictionary manipulation, Programming using string, list and dictionary in-built functions. Python Functions, Organizing python codes using functions.

Unit IV

Python File Operations: Reading files, Writing files in python, Understanding read functions, read(), readline(), readlines(). Understanding write functions, write() and writelines () Manipulating file pointer using seek Programming, using file operations. Database Programming: Connecting to a database, Creating Tables, INSERT, UPDATE, DELETE and READ operations, Transaction Control, Disconnecting from a database, Exception Handling in Databases.

Unit V

Python packages: Simple programs using the built-in functions of packages matplotlib, numpy, pandas etc. GUI Programming: Tkinter introduction, Tkinter and Python Programming, Tk Widgets, Tkinter examples. Python programming with IDE.

Text/Reference Books:

BCA II YEAR (IV SEM)

OPERATING SYSTEM (BCA4001T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Introduction: Definition of an operating system, Mainframe, desktop, single user & multi user OS distributed, real-time and handheld OS.

Unit II

Operating System Structures: System components, operating system services, system calls, systems programs, system structure, virtual machines.

Unit – III

Process Management: criteria, scheduling algorithms, algorithm evaluation.

Process Synchronization: The critical section problem, semaphores, classical problems of synchronization.

Unit IV

Memory Management: Swapping, contiguous memory allocation, paging, segmentation, segmentation with paging.

Unit V

Virtual Memory: Demand paging, page replacement, allocation of frames, thrashing.

SOFTWARE ENGINEERING (BCA4002T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

UNIT – I

Introduction to Software Engineering: Definitions - Size Factors - Quality and Productivity Factors – Managerial Issues - Planning a software project : Defining the problem - Developing a Solution Strategy - Planning the Development Process - Planning an Organization structure - Other Planning Activities.

UNIT – II

Software Cost Estimation: Software cost factors - Software Cost Estimation Techniques – Staffing level Estimation- Estimating Software Maintenance Costs - The Software Requirements, Specification - Formal Specification Techniques - Languages and Processors for Requirements Specification.

UNIT – III

Software design: Fundamental Design Concepts - Modules and Modularization Criteria – Design Notations - Design Techniques - Detailed Design Considerations - Real-Time and Distributed System Design - Test Plans - Milestones, walkthroughs, and Inspections.

UNIT – IV

Implementation issues: Structured Coding Techniques - Coding Style - Standards and Guidelines – documentation guidelines -Type Checking - Scoping Rules - Concurrency Mechanisms.

UNIT – V

Quality Assurance - Walkthroughs and Inspections - Static Analysis - Symbolic Execution – Unit Testing and Debugging - System Testing - Formal Verification: Enhancing Maintainability during Development – Managerial Aspects of Software Maintenance - Source Code Metrics – Other Maintenance Tools and Techniques.

PROGRAMMING WITH JAVA (BCA4003T)

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

An overview of Java: Object oriented programming, Two paradigms, abstraction, the, OOP principles, Java class libraries, variables, arrays, Data types and casting, Operators, operator precedence, Control statements.

Unit II

Classes & Objects: Class fundamentals, declaring object reference variable, Introducing methods, constructors, the key word, garbage collection, Overloading methods. Inheritance and polymorphism: super class and subclass, protected members, Relationship between super and sub class. Inheritance hierarchy, abstract classes and methods, final methods and classes, nested classes, Type wrappers.

Unit-III

String handling: The string constructor, string length, special string operator character extraction, string comparison, searching string, modifying string, data conversion, changing the case of characters, string buffer.

Unit IV

Multithreaded Programming: The Java thread model, the main thread, creating thread, creating multiple thread, using is alive () and join () .

Unit-V

Exception handling: Exception handling fundamentals

Introduction to Applets: Applet Fundamentals

Recommended Books:

1. Herbert Schildt: JAVA 2 The Complete Reference, TMH, Delhi
2. Deitel: How to Program JAVA, PHI
3. U.K. Chakraborty and D.G. Dastidar: Software and Systems An Introduction, Wheeler Publishing, Delhi.
4. Joseph O'Neil and Herb Schildt: Teach Yourself JAVA, TMH, Delhi
5. Java Programming Lecture notes, MIT open courseware,

Business Communication (BCA4005T)

Time: 1.5 Hrs.

Max. Marks: 50

Min Pass: 20

UNIT - I

Concepts and Fundamentals: Meaning of communication, Importance of communication, Process of communication, Essentials of good communication - The seven Cs of communication, Factors responsible for growing importance of communication, Barriers of communication.

UNIT – II

Channels of Communication: Verbal and non verbal Communication, oral and written communication formal and informal communication.

UNIT – III

Arts of Listening: Good listening for improved communications, Art of listening, Meaning, nature and importance of listening, Principles of good listening, Barriers in listening.

UNIT – IV

Writing Letters: Business letters, good news and bad news letters, persuasive letters, Sales letters, Letter styles/ layout.

Report Writing: Meaning & Definition, Types of report (Business report & Academic report), Format of report, Essential requirement of good report writing.

UNIT – V

Modern Techniques of Communication: Internet, Fax, Email, Video Conferencing, sms, bogging, social media etc.

Text / Reference Books

1. Communication by C.S. Rayudu, Himalaya Publishing House.
2. Communication Today - Understanding Creative Skill by Reuben Ray, Himalaya Publishing House.
3. Successful Communication by Malra Treece, Himalaya Publishing House.
4. Business Communication Today by Bovee & Thill, McGraw Hill.
5. Principles of Business Communication by Murphy and Hilderbrandth, Tata McGraw Hill.
6. Effective Communication Skiils by O. N. Kaul & K. K. Sharma, Creative Publishers
7. Essentials of Business Communication by Rajendra Pal & J. S. Korlahalli, Sultan Chand & Sons.
8. Business Communication by K. K. Sinha, Allied Publishers Limited.
9. Business Communication, Lecture Notes,

B.C.A. III Year (V Sem)

E-COMMERCE (BCA5001T) : Elective-1

Time: 3 Hrs.

Max. Marks: 150

Min Pass: 60

Unit-I

E-commerce: Objectives, advantages and disadvantages, Forces driving E-Commerce, Traditional commerce and Ecommerce, E-Commerce opportunities for industries.

Unit-II

E-Commerce Models: Business to consumer, Business to Business, Consumer to Consumer, other models – Brokerage Model, Advertising mode, Aggregator Model, Info-mediary Model, Community Model and value chain Model.

Unit-III

Electronic Payment Systems: Special features required in payment systems, Types of E-payment systems, Smart Card, Electronic wallet, E-Cash, E-cheque, credit card.

Unit-IV

Digital Marketing, E-Customer Relationship Management, E-Supply Chain Management. E-Commerce: An Indian perspective, Digilocker, attendance.gov.in, mygov.in, Swachh Bharat Mission, E-Hospital, National Scholarship portal, E-Sampark, UID, various modes of Digital payment of govt. of India.

Unit-V

Security Issues in E-Commerce: Security risk of E-Commerce, Types of threats, Security tools and risk management approach, Business Ethics, EDI Application in business. Overview of Cyber security .

Text/Reference Books

1. E - Commerce An Indian Perspective by P.T. Joseph, S.J., PHI
2. Doing Business on the Internet E – Commerce (Electronic Commerce for business) by S. Jaiswal, Galgotia Publications.
3. E-Commerce by Schneider, Thomson Publication.
4. E-commerce: Strategy – Technologies and Application by Whitley David, TMH, India.
5. Electronic Commerce by Greenstein, TMH.
6. Electronic Commerce: A managerial perspective – E.Turban – Prentice Hall of India
7. Electronic Commerce: Frontiers of Electronic Commerce – Kalarsta & Whinston, Addison-Wesley.
8. Ecommerce Lecture Notes, Mumbai University

<https://mu.ac.in/wp-content/uploads/2021/11/E-COMMERCE-English-Version.pdf>

Management Information System (BCA5002T): Elective -2

Time: 3 Hrs.

Max. Marks: 150

Min Pass: 60

Unit I

Introduction to system and Basic System Concepts, Types of Systems, The Systems Approach, Information System: Definition & Characteristics, Types of information, Role of Information in Decision Making, Sub-Systems of an Information system: EDP and MIS management levels, EDP/MIS/DSS.

Unit II

An overview of Management Information System: Definition & Characteristics, Components of MIS, Frame Work for Understanding MIS: Information requirements & Levels of Management, Simon's Model of decision-Making, Structured Vs Un-structured decisions, Formal vs. Informal systems..

Unit III

Developing Information Systems: Analysis & Design of Information Systems: Implementation & Evaluation, Pitfalls in MIS Development.

Unit IV

Functional MIS: A Study of Personnel, Financial and production MIS, Introduction to e-business systems, ecommerce – technologies, applications

Unit V

Decision support systems – support systems for planning, control and decision-making

Text / Reference Books

1. J. Kanter, “Management/Information Systems”, PHI.

Web Technology (BCA5003T): Elective-1

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Introduction to Basics of Internet: Concepts of Internet: Domain, IP Addressing, Resolving Domain Names, Overview of TCP/IP and its Services, WWW.

Unit II

Introduction to HTML, Designing Pages with HTML, Essential Tags, Deprecated Tags, Tags and Attributes, Text Styles and Text Arrangements, Text, Effects, Exposure to Various Tags (DIV, MARQUEE, NOBR, DFN, HR, LISTING, Comment, IMG), Color and Background of Web Pages, Lists and their Types, Attributes of Image Tag.

Unit III

Hypertext, Hyperlink and Hypermedia, Links, Anchors and URLs, concept of navigation, Different Section of a Page and Graphics, Footnote , Creating Table, Frame, Form and Style Sheet.

Unit IV

DHTML: Dynamic HTML, Document Object Model, Features of DHTML, CSSP (Cascading Style Sheet Positioning) and JSSS (JavaScript assisted Style Sheet), The ID Attribute, DHTML Events.

Unit V

Web Designing Tools: Front Page Basics , Web Terminologies, Phases of Planning and Building Web Sites, The FTP, HTTP and WAP, Features, Front Page Views, Adding Pictures, Backgrounds, Links, Relating Front Page to DHTML.

Text / Reference Books

1. HTML Black Book – Steven Holzner – Dreamtech Press. Dreamtech Press. Coriolis Group,U.S. (Edition .2000)

Programming with PHP (BCA5004T) : Elective-2

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Introduction- open source-PHP – history- features-variables- statements- operators-conditional statements-if-switch-nesting conditions-merging forms with conditional statements-loops-while-do-for – loop iteration with break and continue.

Unit II

Array Anatomy of an Array, Creating index based and Associative array Accessing array, Element Looping with Index based array, Looping with associative array using each () and foreach(), Some useful Library function.

Unit III

Function What is a function, Define a function, Call by value and Call by reference, Recursive function, String Creating and accessing, String Searching & Replacing String, Formatting String, String Related Library function

Unit IV

Handling Html Form with Php Capturing Form, Data Dealing with Multi-value filed, and Generating File uploaded form, redirecting a form after submission.

Creating and accessing, String Searching & Replacing String, Formatting String, String Related Library function

Unit V

Session and Cookie Introduction to Session Control, Session Functionality What is a Cookie, Setting Cookies with PHP. Using Cookies with Sessions, Deleting Cookies, Registering Session variables, Destroying the variables and Session.

Text / Reference Books

1. Learning PHP, MySQL, books by ‘ O’ riley Press

Cyber Security (BCA5005T): Elective-1

Time: 3 Hrs.

Max. Marks: 100

Min Pass: 40

Unit I

Information security: overview, information security importance, information security components. Threats to information system- external and internal threat, security threat and vulnerability- overview, malware, type of malware: virus, worms, trojans, rootkits, robots, adware's, spywares, ransom wares, zombies etc., desktop security-

Unit II

Application security- database security, e- mail security, internet security, principles of security- confidentiality, integrity, availability, introduction to cryptography- symmetric key cryptography, asymmetric key cryptography, message authentication, applications of cryptography. Security technology- firewall, type of firewall, firewall benefits, VPN, antivirus software

Unit III

Cyberspace- cloud computing & security, social network sites security, attack prevention- passwords, protection against attacks in social media, securing wireless networks, security threats.

Unit IV

Cybercrime- concept of cybercrime, type of cybercrime, phishing, cyber crime prevention, case study, security threats to e- commerce- electronic payment system, Digital Signature– digital signature process.

Unit V

ISO- international organization for standardization, world intellectual property organization, cyber law- cyber law in India, IT act 2000, intellectual property rights- definition, intellectual property, categories of intellectual property, rights protected under intellectual property, copyright, patent and trademark, design- design law in India

Text / Reference Books

Information Security (BCA5006T): Elective-2

Time: 3 Hr

Max. Marks: 100

Min Pass: 40

Unit I

Introduction to Information Security : Attacks, Vulnerability, Security Goals, Security Services and mechanisms.

Conventional Cryptographic Techniques : Conventional substitution and transposition ciphers, One-time Pad, Block cipher and Stream Cipher, Steganography

Unit II

Symmetric and Asymmetric Cryptographic Techniques : DES, AES, RSA algorithms

Unit III

Authentication and Digital Signatures : Use of Cryptography for authentication, Secure Hash function, Key management – Kerberos

Unit IV

Program Security : Nonmalicious Program errors – Buffer overflow, Incomplete mediation, Time-of-check to Time-of-use Errors, Viruses, Trapdoors, Salami attack, Man-in-the-middle attacks, Covert channels

Unit V

Security in Networks : Threats in networks, Network Security Controls – Architecture, Encryption, Content Integrity, Strong Authentication, Access Controls, Wireless Security, Honeypots, Traffic flow security, Firewalls – Design and Types of Firewalls, Personal Firewalls, IDS, Email Security – PGP,S/MIME.

Text / Reference Books

B.C.A. III Year (VI Sem)

Artificial Intelligence (BCA6001T): Elective-1

Time: 3Hrs.

Max. Marks: 100

Min Pass: 60

Unit-I

Overview of AI :-Concept of AI, Characteristics of AI applications , Hard vs. Strong AI, Soft vs. Weak AI, Intelligent Agents: Introduction of agents, Structure of Intelligent agent, Properties of Intelligent Agents.

Unit-II

Problem Solving:- Definition of a Problem, Problem formulation, Well-defined problems, Constraint satisfaction problem, Water jug problem.

Problem solving by searching: types of searching, Uninformed: Breadth-First Search, Depth-First Search, Puzzle problem. Informed search: A* Search, Local search: Hill Climbing, Tic-Tac —Toe Problem.

Unit-III

Knowledge Representation And Reasoning:-Definition and importance of Knowledge, Issues in Knowledge Representation, Knowledge Representation Systems, Properties of Knowledge Representation Systems, Types of Knowledge. Knowledge representation techniques: Rule Based, Semantic Nets, Frames, Logic based.

Unit-IV

Machine learning:- Concepts of machine learning, inductive learning, Explanation based learning, Supervised and unsupervised learning(Basic concepts of each)

Unit-V

Natural Language Processing:- Concepts of natural language understanding and natural language generation, Steps in natural language processing (Basic concepts)

Expert System, Architecture of an expert system, Stages of expert systems development.

Text /Reference Books

- 1.NilsJ.Nilsson,“Principles of Artificial Intelligence(Symbolic Computation/Artificial Intelligence)”, reprint edition,.
2. Stuart Russell, Peter Norvig, “Artificial Intelligence: A Modern Approach”, Pearson Education, 2nd edition,.

4. Artificial Intelligence lecture notes by Prof. P. Mitra and Prof. S. Sarkar
<https://archive.nptel.ac.in/courses/106/105/106105078/>

Data Science (BCA6002T): Elective-2

Time: 3Hrs.

Max. Marks: 150

Min Pass: 60

UNIT-I

Develops all aspects of the machine learning pipeline: data acquisition and cleaning, handling missing data.

UNIT-II

Exploratory data analysis, visualization, feature engineering, modeling, interpretation, presentation in the context of real-world datasets.

UNIT-III

Fundamental considerations for data analysis are emphasized (the bias-variance tradeoff, training, validation, testing).

UNIT-IV

Classical models and techniques for classification and regression are included (linear and logistic regression with regularization, support vector machines, decision trees, random forests, XGBoost).

UNIT-V

Uses the Python data science ecosystem (e.g., sklearn, pandas, matplotlib).

Cloud Computing (BCA6003T): Elective-1

Time: 3Hrs.

Max. Marks: 100

Min Pass: 40

Unit-I

Introduction to Cloud Computing:- Overview of Cloud Computing, Evolution of Cloud Computing, Characteristics of Cloud Computing, Types of cloud and its Cloud services, Benefits and challenges of cloud computing, Applications cloud computing, Cloud Storage, Cloud services requirements, cloud and dynamic infrastructure, Cloud adoption.

Unit-II

Cloud Computing Architecture:- Platform as service, Software as a service, Infrastructure as service, Cloud deployment models, Public clouds, Private clouds, Community cloud, Hybrid clouds, Cloud design and implementation using SOA, security, trust and privacy

Unit -III

Cloud Visualization Technology:- Overview of Virtualization techniques, Types of Virtualizations, Implementation Levels of Virtualization Structures, virtualization benefits, server virtualization, hypervisor management software, virtual infrastructure requirements.

Unit -IV

Map Reduce:- Introduction to parallel computing, Map-reduce model, Applications of map reduce, Parallel efficiency of Map-Reduce, Map Reduce infrastructure.

Unit -V

Cloud Security- Introduction to Security, Cloud Security challenges and Risks, Software-as-a-Service Security, Security Monitoring, Security Architecture Design, Data Security, Application Security. Cloud platforms:- Web services, App Engine, Azures Platform, Aneka

Data Warehousing (BCA6004T): Elective-2

Time: 3Hrs.

Max. Marks: 100

Min Pass: 40

Unit – I

Warehouse: What is it, Who Need It, and Why?, Things to Consider, Managing the Data Warehouse, Data Warehouse Design Methodology, Data Marts and Start Schema Design, Fundamentals of ETL Architecture, Partitioning Data, Indexing Data.

Unit – II

Data mining – Introduction, Data mining on what kind of data , Data mining functionalities classification of Data mining systems, Major issues in Data mining Mining Association rules in large databases - Association rule mining, Mining single-Dimensional Boolean association rules from Transactional databases, Mining multi-Dimensional Association rules from relational Databases and Data Warehouses

Unit – III

Classification and Prediction - Introduction classification by decision tree induction, Bayesian Classification. Other classification methods, classification by back propagation, Prediction, classifier accuracy

Unit – IV

Cluster analysis – Introduction types of data in cluster analysis a categorization of major clustering methods portioning methods, hierarchical methods, Density based methods,: DBSCAN, Grid-based method : STRING , Model based clustering method: Statistical Approach, outlier analysis.

Unit – V

Classification & Prediction and Cluster Analysis: Issues regarding classification & prediction, Different Classification Methods, Prediction, Cluster Analysis, Major Clustering Methods, Applications & Trends in Data Mining: Data Mining Applications, currently available tools.
