

**NEP-2020 BASED CURRICULA AND EXAMINATION SCHEME,
UNIVERSITY OF KOTA, KOTA**

**M.Sc. Biotechnology
programme**

(Four semester scheme)

CBCS pattern (with effect from 2025-2026)

DEPARTMENT OF BIOTECHNOLOGY

**UNIVERSITY OF KOTA
MBS Marg, KOTA (Rajasthan)-324 005
INDIA**

Course Code: MBT 12350P

Type of the Course: Professional

Title of the Course: M.Sc. Biotechnology

Level of the Course: PG level

Credit of the Course: 100

Delivery subtype of the Course: Practical

Pre requisites and co requisites of the Course

- ❖ A candidate who has passed any one of the following examinations from any University recognized by the UGC shall be permitted to take admission in M.Sc. First Semester to award M.Sc. degree in Biotechnology from this University after completion of a course of study of two academic years divided in the foursemester scheme of examination:
- ❖ B.Sc. (Pass / Hons) under biological science stream with subjects: Biotechnology, Microbiology, Biochemistry, Biology, Chemistry, Botany, Zoology, Genetics, Environmental Sciences, Bioinformatics, Pharmaceutical Science, etc. or
- ❖ Bachelor of Science and Education (B.Sc.-B.Ed.) with subject biology, chemistry, botany, zoology.
- ❖ B.Tech. Biotechnology

University of Kota, Kota
M.Sc. Biotechnology
Semester wise Consolidated Common Scheme of Examinations for the Academic Sessions 2025-2026

Year / Semester	Number, Code or ID and Nomenclature of Paper				Duration of Exam. (in Hrs.)	Distribution of Assessment Marks							Total		
	Number of Paper	Code / ID of Paper	of Paper	Nomenclature of Paper		Teaching Hrs / Week & Credit points			Continuous Internal Assessment (30%)			Semester or External Assessment (70%)			
						Teaching Th.	Pr.	Credit Points	Max. Marks	Min. Marks	Pass	Max. Marks	Min. Pass Marks	Pass Marks	Max. Marks
1st Year I Semester	Paper-1.1	MBT-5101	DCC	Cell Biology and Enzyme Technology	3	4	-	4	30	12		70	28	100	40
	Paper-1.2	MBT-5102	DCC	General Microbiology	3	4	-	4	30	12		70	28	100	40
	Paper-1.3	MBT-5103	DCC	Bio-Instrumentation	3	4	-	4	30	12		70	28	100	40
	Paper-1.4	MBT-5104	DCC	Fundamentals of Biochemistry	3	4	-	4	30	12		70	28	100	40
	Paper-1.5	MBT-5105	DCC	Lab Course-I	6	-	8	4	--	--		100	50	100	50
	Paper-1.6	MBT-5106	DCC	Lab Course-II	6		8	4				100	50	100	50
		Total (I Semester)				24	32		24	120	48		480	212	600
1st Year II Semester	Paper-2.1	MBT-5201	DCC	Fundamentals of Molecular Biology	3	4	-	4	30	12		70	28	100	40
	Paper-2.2	MBT-5202	DCC	Basic Plant and Animal Tissue Culture	3	4	-	4	30	12		70	28	100	40
	Paper-2.3	MBT-5203	DCC	Immunology and Immunotechnology	3	4	-	4	30	12		70	28	100	40

	Paper-2.4	MBT-5204	DCC	Genetic Engineering and its Applications	3	4	-	4	30	12	70	28	100	40
	Paper-2.5	MBT-5205	DCC	Lab Course-III	6		8	4			100	50	100	50
	Paper-2.6	MBT-5206	DCC	Lab Course-IV	6		8	4			100	50	100	50
	Total (II Semester)				24	32		24	120	48	480	212	600	260
2nd Year III Semester	Paper-3.1	MBT-6301	SEC	Applied Plant and Animal Biotechnology	3	4	-	4	30	12	70	28	100	40
	Paper-3.2	MBT-6302	DSE	Fermentation Technology, Biosafety and IPR	3	4	-	4	30	12	70	28	100	40
	Paper-3.3	MBT-6303	DSE	ELECTIVE I 1.Environmental Biotechnology 2. Stem cells and Healthcare	3	4	-	4	30	12	70	28	100	40
	Paper-3.4	MBT-6304	DSE	ELECTIVE II 1.Medical Biotechnology 2.Genomics and Proteomics	3	4		4	30	12	70	28	100	40
	Paper-3.5	MBT-6305	DCC	Lab Course-V	6	-	8	4	--	--	100	50	100	50
	Paper-3.6	MBT-6306	DCC	Lab Course-VI	6		8	4			100	50	100	50
	Total (III Semester)				24	32		24	120	48	480	212	600	260
2nd Year IV Semester	Paper-4.1	MBT-6401	DSE	Industrial Bioprocess Technology	3	4	-	4	30	12	70	28	100	40
	Paper-4.2	MBT-6402	DSE	Biostatistics, Bioinformatics and Research Methodology	3	4	-	4	30	12	70	28	100	40
	Paper-4.3	MBT-6403	DSE	Agriculture biotechnology	3	-	8	4	-	-	200	100	100	100
	Paper-4.4	MBT-6404	SEM	Lab Course VII	6	-	-	4	-	-	100	50	100	50
	Paper-4.5	MBT-6405	DPR	Dissertation	3	-	-	8	--	--	100	50	200	50
	Total (IV Semester)				18	16		24	60	24	540	256	600	280
	GrandTotal (I + II + III + IV Semester)				90	112		96	420	168	1980	892	2400	1060

Salient features are as follows:

- Discipline Centric Core (DCC) Core Courses in Biotechnology as Major.
- Discipline Specific Electives (DSE) or Elective Courses in the Core Subject or Discipline.
- Open Electives (OE) are Elective Courses offered to students from non-core Subjects across disciplines.
- Skill Enhancement Courses (SEC) that are domain-specific or generic.
- Dissertation/Project/ course (DPR) or Elective course in the core subject □
Seminar/Viva course (SEM) or Elective course in the core subject

Objectives of the Course: Biotechnology is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use".

- Students will gain necessary knowledge and develop specialized skills in the different areas of Biotechnology.
- Students will think critically and creatively about the use of biotechnology to address local and global problems.
- Students will be able to implement the scientific skills for development of industrial applications and entrepreneurship

Environmental biotechnology latest research and news

Biotechnology news, Science Daily, Nature News, Science News

Nature Biotechnology, Journal of Applied Biology & Biotechnology

Course learning outcome

Upon completion of the M.Sc. Biotechnology programme, the candidate should be able to:

- Demonstrate knowledge for in-depth analytical and critical thinking to identify, formulate and solve the issues related to Biotechnology Industry, Pharma industry, Medical or hospital related organizations, Regulatory Agencies & Academia.
- Demonstrate skills to use modern analytical tools/ software/ equipment to design & develop experiments and analyze and solve problems in various courses of biotechnology.
- Appreciate and execute their professional roles in society as biotechnology professionals, employers and employees in various industries, regulators, researchers, educators and managers
- Acquire basic and advance skills in various fields of biotechnology for self-employment and entrepreneurship

Duration of the Course:

The course for the degree of Master of Science in Biotechnology shall consist of two academic years / sessions divided into four equal semesters. The first academic year / session will comprise first and second semesters. The second academic year / session will comprise of the third and fourth semesters. Each semester shall comprise normally **90 working days**. The course shall run on the regular basis.

Minimum Marks required in Qualifying Examination:

Qualifying examination passed from any recognised University which is situated in Rajasthan State:

- General Category = 55%.
- SC / ST / OBC / SBC or MBC = Min. Pass Marks
- Qualifying examination passed from any recognised University which is situated outside the Rajasthan State:
- All Categories = 60%.

Eligibility for Admission in M.Sc. Third Semester:

A candidate may be promoted in the next academic session (in odd semester *i.e.* III semester) if he/she has cleared collectively at least 50% of the papers of both semesters (*i.e.* semester I & II) of previous academic session with 50% of the aggregate marks. The candidate who does not fulfill the above condition will remain as an ex-student and will re-appear in the due paper examinations along with next odd/even semester examinations.

A candidate who has passed B.Ed. examination as a regular course of study after completing first and second semester examinations from this University shall also be eligible to take admission in third semester examination as a regular candidate.

Open elective:

This course is open to students of other Department of the University. The student of the M.Sc. Biotechnology Programme can also take up an open elective being offered by any of the other Department of the University of Kota or from Government online portal like SWAYAM, MOOC etc.

Attendance:

Every teaching faculty, handling a course, shall be responsible for the maintenance of Attendance Register for candidates who have registered for the course. The teacher of the course must intimate the Head of the Department at least seven calendar days before the last instruction day in the semester about the attendance particulars of all students. Each student should earn 75% attendance in the courses of the particular semester failing which he or she will not be permitted to sit in the end semester examinations. However, it shall be open to the authorities to grant exemption to a candidate who has failed to obtain the prescribed 75% attendance for valid reasons and such exemptions should not under any circumstance be granted for attendance below 65%.

Teaching Methodologies:

The classroom teaching would be through conventional lectures or use of OHP or power point presentations (PPT). The lecture would be such that the student should participate actively in the discussion. Student seminars would be conducted and scientific discussions would be arranged to improve their communicative skill. In the laboratory, instruction would be given for the experiments followed by demonstration and finally the students have to do the experiments individually. For the students of slow learners, special attention would be given.

Assessment Pattern:

The assessment of the students shall be divided into two parts in which first part is continuous assessment or internal assessment or mid-term assessment (30% weightage of the maximum marks) and second part is semester assessment or external assessment or end-term assessment (70% weightage of the maximum marks). Assessment pattern and distribution of maximum marks is summarized as given below:

(i) Continuous or Internal or Mid Term Assessment:

- (a) The continuous or internal or mid-term assessment (30% weightage of the maximum marks) for each theory paper shall be taken by the faculty members of the respective Departments during each semester. There will be three internal assessment tests (*i.e.* first internal assessment test or first mid-term test and second internal assessment test or second mid-term test and third internal assessment test) each of 10% weightage of maximum marks of each theory paper. Each internal assessment shall be of one hour duration for theory paper and shall be taken according to academic calendar which will be notified by the Department / University.

- (b) For practical papers, there will be no continuous or internal or mid-term assessment. There will be only one external or semester or end-term assessment (100% weightage of maximum marks).
- (c) A student who remains absent (defaulter) or fails or wants to improve the marks in the internal assessment may be permitted to appear in the desired paper(s) (only one time) in the same semester with the permission of the concern Head of the Department. A defaulter / improvement fee of Rupees 250/- per paper shall be taken from such candidates. Duly forwarded application of such candidates by the teacher concerned shall be submitted to Head of the Department who may permit the candidate to appear in the internal assessment after production of satisfactory evidence about the reason of his/her absence in the test(s) and deposition of the defaulter / improvement fee. A record of such candidates shall be kept in the Department.
- (d) Regular attendance of the student shall be considered in the internal assessment. Some marks for regularity shall be given to the student(s) who is/are taken classes regularly from the 5% weightage of the maximum marks. The 5% weightage of the maximum marks of regularity shall be taken from the weightage given for second internal assessment (10% weightage of maximum marks). After excluding the 5% weightage of regularity, the second internal assessment shall be of 10% weightage of maximum marks. If the attendance / regularity factor is similar for all the students, then it may be merged with the weightage of second internal assessment test (class test, home assignment, quiz, seminar, *etc.*) and then second internal assessment test shall be of 15% weightage of maximum marks.
- (e) 'Student should qualify both internal & external assessment separately to pass the paper i.e., if candidate passes in external & fails in internal, the candidate has to reappear in internal & external exam of that paper. But if candidate passes in the internal & fails in the external, the candidate has to reappear in external exam of the paper and in internal examination he has option either to forward the obtained internal marks of that paper in the previous attempt (on the basis of the application submitted by the candidate and approval of Head of Department for the same) or can reappear in the internal examination if he wants to improve his marks in that paper.'

(ii) Semester or External or End Term Assessment:

- (a) The semester or external or end-term assessment (70% weightage of the maximum marks) shall be three hours duration to each theory paper and twelve hours duration (spread over two days with 6 hours per day) for each practical paper and shall be taken by the University at the end of each semester.

(b) The syllabus for each theory paper is divided into five independent units and question paper for each theory will be divided into three sections as mentioned below:

Section-A will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.

Section-B will carry 50 marks with equally divided into five long answer type questions. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

(c) The syllabus of practical paper is divided according to main streams of Biotechnology. Marks shall be awarded on the basis of major & minor experiments, spotting, viva-voce, practical record, regularity factor, lab skills, maintain cleanness of workplace, etc.

Question Paper Pattern:

(A) Continuous or Internal or Mid Term Assessment:

30% weightage of Maximum Marks (30 Marks out of 100 Maximum Marks).

(i) First Continuous or Internal or Mid Term Assessment:

Format

Department of

College / University Address.....

First Internal Assessment Test 20... - 20....

Class	:	Max. Marks	:	10
			Marks	
Semester	:	Duration	of	:
		Exam.		
Subject	:	Date	of	:
		Examination		
Paper	:	Name	of	:
		Teacher		

Note: All questions are compulsory and marks are given at the end of the each question. Two or three sub-divisions may be given in the question.

Q. No. 1. or

.....
4 Marks

Q. No. 2. **or**

.....
3 Marks

Q. No. 3.

or

.....
3 Marks

(ii) Second Continuous or Internal or Mid Term Assessment:

(a) Attendance:

Marks shall be given by the faculty member in each paper according to its weightage.

5% weightage of Maximum Marks

Note:

If the attendance / regularity factor is similar for all the students, then it may be merged with the weightage of second internal assessment test (class test, assignment, quiz, etc.).

(b) Seminar / Presentation/ Minor Projects

5% or 10% weightage of Maximum Marks

Format

Department of

College / University Address.....

Second Internal Assessment Test 20... - 20....

Practical Examinations: For All Lab Courses

Continuous or Internal or Mid Term Assessment: *Not applicable in practical.*

External or Semester or End Term Assessment:

Duration of Exam : 6 Hours Maximum

Marks : 100 Marks*

Distribution of Maximum Marks:

S. No.	Name of Exercise	Marks
1.	Exercise No. 1 : Major Experiment	20
2.	Exercise No. 2 : Major Experiment	20
3.	Exercise No. 3 : Minor Experiment	10
4.	Exercise No. 4 : Minor Experiment	10
5.	Exercise No. 5 : Spotting Experiment(5 spots)	15

6.	Laboratory Skills, Regularity, etc.	10
7.	Practical Record	5
8.	Viva-voce	10
Total Marks		100

Seminar:

The students shall compulsorily have to deliver an oral presentation on for continuous or internal or mid-term assessment in each semester. There will not be semester or external or end-term assessment for seminar.

Dissertation:

A dissertation shall be initiated at the end of the Semester III and continued during Semester IV. A dissertation may be undertaken in any research laboratories/industries/university department. The students shall compulsorily submit the certificate of completion and report to the Department during the practical examination. The marks will be awarded by the external examiner on the day of the practical examination on the basis of the experimental, presentation and viva-voce.

Minimum Pass Marks and Rules regarding Determination of Results:

Each semester shall be regarded as a unit for working out the result of the candidates. The result of each semester examination shall be worked out separately (even if the candidate has appeared at the paper(s) of the lower semester examination alongwith the papers of higher semester examination) in accordance with the following conditions:

- (i) The candidate shall be declared as pass in a semester examination, if he/she secures at least 40% marks in each theory paper separately in external & internal examinations and 50% marks in each practical paper and at least 50% marks in project/ dissertation with 50% aggregate marks in that semester.
- (ii) A candidate declared as fail/absent in one or more papers at any odd semester examination shall be permitted to take admission in the next higher semester (even semester) of the same academic session.
- (iii) A candidate may be promoted in the next academic session (odd semester) if he/she cleared collectively at least 50% of the papers of both semester of previous academic session with 50% of the aggregate marks. The candidate who does not fulfil the above condition will remain as an ex-student and will appear S in the due papers with next odd/even semester exams.

- (iv) If any student who is provisionally admitted in higher odd semester but not secure prescribed minimum marks in previous semesters will be treated as ex-student and his/her admission fee will be carry forward to the next odd semester of forthcoming academic session.

- (v) A candidate may be promoted in the next semester (odd semester) if he/she has cleared collectively at least 50% of the papers of both semesters of previous academic session with 50% of the aggregate marks. The candidate who does not fulfill this condition will remain in the same semester as an ex-student and will re-appear in the due papers examination along with next odd/even semester examinations.

- (vi) If any student who is provisionally admitted in higher odd semester but could not secure prescribed minimum marks in previous semesters will be treated as ex-student and his/her admission fee will be carry forwarded to the next odd semester of forthcoming academic session.

- (vii) A candidate declared as failed in that particular paper he/she can re-appear for that paper in the next year examination as a due paper. However, the internal marks shall be carried forward for the total marks of the due examination. A candidate will not be allowed to re-appear in the practical examination.

- (viii) A candidate may be given only two additional chances for passing the semester thus maximum tenure for completing the two years' postgraduate course will be limited to four years, for three years postgraduate programme up to five years and so on.

- (ix) If the number of papers prescribed at the first and second or third and fourth semester examination is an odd number, it shall be increased by one for the purpose of reckoning 50% of the papers.

- (x) A candidate who passes in 50% or more papers of the first and second semester examination, and thereby becomes eligible for admission to the third semester examination, but chooses not to do so and desires to appear in the remaining papers of first and second semester examination only or to re-appear in all the prescribed papers and practical/dissertation/seminar of the M.Sc. first and second semester examination will be permitted to do so on the condition that in the latter case his previous performance will be treated as cancelled.

- (xi) If a candidate, who has been promoted to the next semester and wishes to improve his / her performance in the theory paper(s) of previous semester, can be permitted to do so in case of the theory papers only, not in practical / project / dissertation / seminar, belonging to the immediately preceding semester only for one time in these papers in next odd/even semester examinations. In such a case, he/she shall have to appear in these papers along with the papers of his/her own semester.

- (xii) A candidate shall be declared as passed after the result of the fourth semester examination, if he/she cleared all papers of the all the four semesters and secure minimum 40% of the aggregate marks of the maximum marks in theory papers and 50% of the aggregate marks of the maximum marks for practical / dissertation / presentation / seminar prescribed for four semesters Master's programme.

- (xiii) In the case of an ex-student, the marks secured by him/her at his/her last examination as a regular candidate shall be taken into account except in cases where a candidate is reappearing at the examination as a regular student and in that event, he/she shall have to repeat the internal assessment test which will be finally accounted for working out his result.

- (xiv) A candidate who has failed at the M.Sc. third and fourth semester examination but has passed in at least 50% of the papers prescribed for the examination shall be exempted from re-appearing in a subsequent year in the papers in which he/she has passed.

- (xv) If a candidate clears any paper(s) prescribed at the first and second semester (previous) and/or third and fourth semester (final) examination after a continuous period of three years, then for the purpose of working out his/her division, only the minimum pass marks shall be taken into account in respect of such paper(s) as are cleared after the aforesaid period provided that in case where a candidate requires more than 40% marks in order to reach the requisite minimum aggregate, as many marks out of those secured by him/her will be taken in to account as would enable him/her to make up the deficiency in the requisite minimum aggregate.

- (xvi) In case the candidate is not able to clear his/her due paper(s) in the stipulated period as mentioned above (continuous period of three years), he/she may be given last one mercy attempt to clear due paper(s) subjected to approval of the Vice Chancellor or Board of Management.

- (xvii) The grace marks scheme shall be applicable as per University norms.

M.Sc. Biotechnology

First Semester

Paper 1.1: MBT-5101 Cell Biology and Enzyme Technology

Contact Hours / Week : 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination : 3 Hours	Continuous/Internal/Assessment	: 30 Marks
	Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type questions (answer about in 400 words). Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

The cell theory, Modern concepts of cell, Endosymbiont theory, overview of prokaryotic and eukaryotic cell types.

Plasma Membrane: various models of biological membrane, Membrane structure and composition: lipid bilayer, membrane carbohydrates, membrane proteins, channel proteins, carrier proteins and pumps. Study of the GERL Complex: Golgi complex, Endoplasmic reticulum and Lysosomes. Peroxisomes and Ribosome.

UNIT-II

15-18L

Structure of Nucleus: Internal organization of Nucleosome.

Chromosome: Structure, chemical composition and function, cellular cytoskeleton. Structure and function.

Transport across membrane as active transport and simple and facilitated diffusion).

Mitochondrial and chloroplast energy transformation: ultra structure of mitochondria and chloroplasts.

UNIT-III

15-18L

Chromosome structure and packaging of DNA. Nucleosome organization, molecular organization of centromere and telomeres. Cell cycle, Cell Cycle Regulators- Cyclin and CDKs,

Mechanism of cell division: Mitosis and Meiosis. Programmed Cell Death: intrinsic and extrinsic pathways. Cancer cells and factors involved in oncogenesis.

UNIT- IV

15-18L

Introduction of enzymes, Classification, Nomenclature, General Properties. Mechanism of enzyme action and regulation.

Steady state kinetics: Methods of estimation of rate of enzyme catalyzed reaction with special reference to Michaelis-menton kinetics. Feedback inhibition. Isozymes, ribozymes, abzymes, zymogens, multi-enzymes complexes and multifunctional enzymes.

UNIT- V

15-18L

Enzyme and cell immobilization.

Mechanism of enzyme function and reactions in process techniques; enzymatic bioconversions e.g., starch and sugar conversion process and various other enzyme catalytic action in food processing.

Enzymes biosensor: Principle, components and applications.

Advancement in enzyme technology. Diagnostic importance of enzymes.

Reference Books:

1. The World of the Cell: Becker, Kleinsmith and Hardin.
2. Cell and molecular biology: Gerald Karp.
3. Cell and molecular biology: P.K. Gupta.
4. Molecular cell biology: By Lodish.
5. The Cell: Cooper.
6. Molecular biology of the cell: Bruce Alberts.
7. Enzymology and Enzyme Technology: S M Bhatt.
8. Enzyme Technology- M F Chaplin and D C Bucks
9. Industrial Enzymology- Godfrey and West
10. Enzyme – Copeland
11. Enzyme in Industry – W. Gerhartz
12. Principles of Biochemistry. Ed Lehninger, Nelson and Cox. CBS publishers and distributors.
13. Biochemistry. Ed Donald Voet and Judith G. Voet. John Wiley & sons, Inc.

Microbial metabolism: Phototrophy, chemolithotrophy, anaerobic respiration, fermentation, methanogens, biological nitrogen fixation.

UNIT V

15-18L

Microbial diseases: Food and water borne disease, Anthrax, Tuberculosis, Covid-19, AIDS, Influenza, cutaneous and systemic mycoses, Malaria.

Antimicrobial drugs: General Characteristics, Antibacterial (Classification and mode of action), antifungal and antiviral.

UNIT- V

15-18L

Principles, instrumentation and applications: Infrared Spectroscopy, fluorescence Spectroscopy, NMR, ESR., Mass Spectroscopy (types of ion source, analyzers and detectors), GC-MS, X Ray Microanalysis.

Techniques with radioisotopes: GM counter, Scintillation counter, Autoradiography, RIA.

M.Sc. Biotechnology

First Semester

Paper-1.4 MBT-5104 Fundamentals of Biochemistry

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT- I

15-18L

Covalent, Non-Covalent, hydrophilic and hydrophobic interaction and their influence on structure of biomolecules. Acid, bases, pH, pK, and ionization of water and Buffers. Henderson-Hasselbalch equation

High energy phosphate compounds: Introduction, Phosphate group transfer free energy of hydrolysis of ATP and sugar phosphate, Concepts of bioenergetics. First and second law of thermodynamics. Gibbs free energy.

UNIT-II

15-18L

Carbohydrates: Classification, characteristics and functions. Reactions of carbohydrates, Isomerism of carbohydrates, Fischer projections, Haworth structures.

Carbohydrate Metabolism: Introduction, Glycolysis, Gluconeogenesis, Glycolysis. TCA cycle, Electron Transport chain, Oxidative phosphorylation.

UNIT-III 15-18L

Lipids-Introduction, Sources, Nomenclature, Classification. Properties and Functions.

Lipid Metabolism- Biodegradation of fatty acids, beta – oxidations of fatty acids

Biosynthesis of fatty acids – phospholipids, sphingolipids and Cholesterol.

UNIT- IV

15-18L

Amino Acid Metabolism- Overview of amino acid metabolism, Biodegradation of amino acids – deamination, transamination, decarboxylation, glutamine and glutamic acid pathway, urea cycle, uric acid synthesis. Protein structure (primary, secondary, tertiary and quaternary). Ramachandran plot.

UNIT- V

15-18L

Structure, composition and properties of Nucleic acid, Biosynthesis and degradation of Purines and Pyrimidines. Biodegradation of Purines and Pyrimidine, Water and Fat soluble Vitamins; Distribution, interaction and functions

7. Biochemistry:-Pankaja Nayak.
8. Biochemistry:-Lehninger
9. Fundamental of Biochemistry:-A.C.Dev.
10. Biochemistry: - J.L. Jain.
11. Elements of Biochemistry :- H.R.Shrivastava.
12. Essentials of Biochemistry:- Pankaja Naik
13. Instrument method of Analysis :- Dean John A

M.Sc. Biotechnology
First Semester
Paper 1.5 MBT 5105 Lab Course-I

Practical Exercises

1. Mitosis in onion root tip cells.
2. Meiosis in anther.
3. Study of mitosis and meiosis from permanent slides.
4. Study of cell biology techniques.
5. Urease estimation by titrimetric method.
6. Urease estimation by colorimetric method.
7. Acid Phosphatase estimation.
8. Alkaline Phosphatase estimation.
9. Estimation of amylase.
10. Study of enzyme kinetics – calculation of V_{max} , K_m , K_{cat} values.
11. Applications of enzymes.
12. Immobilization of *Saccharomyces cerevisiae*.
13. Microscopy: simple, compound, Dark Field, phase contrast.
14. Micrometry: Calibration of stage and ocular micrometer and measurement of the given biological sample.
15. Cleanliness, media preparation, sterilization, culture methods, dilution techniques in microbiology.
16. Staining techniques in microbiology i) Flagella staining ii) Negative staining iii) Spore staining iv) Capsule staining. (v) Lactophenol blue.
17. Isolation of pure culture- Serial Dilution, Pour, Spread, Streak.
18. To learn culture preservation techniques (Agar slants, stabs and glycerol stocks).
19. Identification of unknown bacteria by biochemical tests-IMVIC, Catalase test, starch hydrolysis.
20. Bacterial growth curve-serial dilution, plating and turbidity measurement.
21. Antibiotics Sensitivity test.
22. Standard qualitative analysis of water (microorganisms).

M.Sc. Biotechnology
First Semester
Paper 1.6 MBT 5106 Lab Course-II

Practical Exercises

1. Ion exchange and gel filtration chromatography.
2. Separation of subcellular organelles by differential centrifugation.
3. Separation of blood cells by density gradient centrifugation.
4. Polyacrylamide gel electrophoresis of proteins.
5. To perform PCR for amplification of target DNA segment (or gene).
6. Electrophoretic separation of DNA in agarose gel.

7. SDS PAGE for protein separation.
8. Southern Blotting Techniques.
9. Restriction Digestion.
10. Demonstration of DNA fingerprinting.
11. Preparation of reagents, buffers and solutions. pH meter: Buffering capacity of a buffer, indicators. To determine the pK_a value and hence the dissociation constant of a given acid by using pH meter.
12. Estimation of protein: Lowry, Biuret and Bradford methods, standard curves linear regression and assessment of ranges and reliability.
13. Estimation of reducing sugar by DNS method.
14. Protein purification: Ammonium sulphate, acetone, TCA pptn. Dialysis concentration.
15. Thin layer chromatography: amino acids lipids, mixture of dyes.
16. Chlorophyll-a concentration measurement with acetone method using spectrophotometer.
17. Spectrophotometry: To find out absorption spectrum of given chromophore and/or oxidised and reduced forms (NAD and NADH).
18. Colorimetry: To determine the association constant of given indicator calorimetrically and to prepare the buffer solutions in pH range of 2.2 to 8.0.
19. To estimate total hardness of water
20. To estimate Calcium hardness of water
21. To estimate the total solids (Ts), total dissolved solids (TDS) and suspended solids (SS) in the given water sample

M.Sc. Biotechnology

Second Semester

Paper-2.1: MBT-5201 Fundamentals of Molecular Biology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT- I

15-18L

Genetic Material: Structure, chemical composition and organization. Central Dogma
Difference between euchromatin and heterochromatin. DNA super coiling, Different forms
of DNA. Repetitive DNA and satellite DNA. Experimental proof of DNA as genetic
material. Mutation- Types and various mutagens.

UNIT- II

15-18L

DNA replication in prokaryotes and eukaryotes-Initiation, elongation, termination, fidelity
of replication, enzymology of replication. Regulation at replication level. Chromosome
walking, extrachromosomal replicons, DNA repair- enzymes; Photoreactivation; Nucleotide
excision repair; Mismatch correction; SOS repair; Non-homologous end joining;
Recombination: Homologous.

UNIT- III

15-18L

Transcription: transcription in prokaryotes and eukaryotes- Initiation, elongation and
termination. Transcription factors and machinery, transcription activator and repressor. RNA
processing-capping, splicing and polyadenylation, RNA editing Structure and function of
different types of RNA, RNA transport. Ribozymes

UNIT- IV

15-18L

Translation machinery; Ribosomes; Features of genetic code. Proteins Synthesis:
Mechanism of translation in Prokaryotes and Eukaryotes–initiation, elongation, termination.
Transposons – Transposable Elements, Classification of Transposons, Types.

UNIT- V

15-18L

Gene Regulation: Prokaryotic Gene Regulatory Mechanism; Operon concept: Lac and Trp
operons. Gene Regulation in Eukaryotes – Attenuation control, Regulation by DNA
Methylation, Transcription Factors, Enhancer Element.

Text/Reference books:

8. Molecular Biotechnology: S.B. Primrose
9. Molecular Biotechnology: Glick
10. Lodish, H *et al* (2012) molecular cell biology (1st edition) Benjamin Cummings publication,
USA

UNIT-V

15-18L

Types of animal cell culture- primary and secondary cell culture, development of cell lines or established cultures. Biology and characterization of the cultured cells, measuring parameters of growth. Basic techniques of mammalian cell culture in vitro; culture, maintenance of cell culture; cell separation. Disaggregation of tissue and primary culture, maintenance of cell culture. Basic techniques of mammalian cell culture, methods of sub culturing.

Reference books:

11. Plant Tissue Culture, Animal Tissue Culture, Immunology-A Laboratory Manual by Neerja Srivastava and Satish kumarsharma, laxmj publication private lmt.
12. 12 Animal Cell Culture: Concept And Application" by S M Bhatt, Narosa publication house,(2011).

M.Sc. Biotechnology
Second Semester

Paper -2.3: MBT-5203 Immunology and Immuno-technology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

Cells of immune system and organs of the immune system.

Types of the Immunity - Innate and adaptive, Humoral and cell mediated, Active and passive immunization.

Antigens: Structure and properties, Types, haptens, adjuvants, antigen specificity, antigenic determinants, super antigens.

UNIT-II

15-18L

Immunoglobulins-basic structure, classes and subclasses of immunoglobulins.

Complement system: Structure, complement pathways and biological consequence of complement activation.

Hybridoma Technology: Monoclonal antibodies production. Antibody engineering: Chimeric and Humanized monoclonal antibodies

UNIT-III 15-18L

Secondary Immune Response; Generation of Humoral Immune Response (Plasma and Memory cells); Generation of Cell Mediated Immune Response (Self MHC restriction, T cell activation, Co- stimulatory signals).

Major Histocompatibility Complex (MHC), HLA typing

Hypersensitivity reactions- Type I- Anaphylaxis. Type II- Antibody dependent cell cytotoxicity.

Type III- Immune complex mediated reactions. Type IV-Cell mediated hypersensitivity reactions.

UNIT-IV

15-18L

Vaccines and its types (Live, Attenuated, Inactivated, Subunit, Toxoid).

Tumour Immunology: Tumor specific antigens. Immune response to tumors.

Cytokines : Properties and their role in immune regulation.

UNIT-V

15-18L

Antigen- Antibody interaction - Agglutination, Precipitation, Immunofluorescence, ELISA, Radioimmunoassays, Western blotting, Cell cytotoxic assay

Autoimmunity: Autoimmune diseases (Addison's disease, Grave's disease, Hashimoto's thyroiditis, rheumatoid arthritis. Systemic Lupus erythematosus).

5. The Experimental Foundations of Modern Immunology. Authors- Clark, V.R., John Willey and Sons, Incl.
6. Fundamental Immunology. Author – W.E. Paul, Raven Press, New York.
7. Fundamentals of Immunology. Authors – R.M. Coleman, M.F. Lombord and R.E. Sicard 2nd ed. C. Brown publishers.
8. Immunology. Authors – D.M. Weir and J. Steward 7th Ed. (1993).
9. Immunology : Shailendra Sharma.
10. Immunology: C.V.Rao.
11. Immunology and Immunotechnology: ASHIM K. CHAKRAVARTY

M.Sc. Biotechnology
Second Semester
Paper 2.4 MBT-5204 Genetic Engineering and its Application

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

Unit -I

15-18L

Genetic engineering tools and their applications: Restriction-modification system & different enzymes, Gene Cloning Vectors- Plasmids, bacteriophages, phagemids, cosmids. Artificial chromosome vectors (YAC, BAC), virus derived vectors-SV40, M13, retroviral vectors.

UNIT- II

15-18L

Gene manipulation: cDNA Synthesis and its Cloning; mRNA enrichment, DNA primers, linkers and adaptors, Library (cDNA and Genomic) construction and screening. Alternative

Strategies of Gene Cloning- Two and three hybrid systems, cloning of genes in expression vectors, Microarray Technology.

UNIT-III

15-18L

Protein Engineering and Processing of Recombinant proteins - Directed Mutagenesis- Oligo- nucleotide with M13 DNA, PCR, PCR amplified oligo-nucleotide and Random mutagenesis. Protein Engineering: adding disulfide bonds, reducing number of free sulfhydryl residues, changing amino-acids, increasing and modifying enzymatic activity.

UNIT- IV

15-18L

Processing of Recombinant proteins: Purification and refolding. Characterization of recombinant proteins, stabilization of proteins, DNA markers Molecular marker: RAPD, RFLP, AFLP, ISR, SNP. Omics Technology: Genomics, transcriptomics, proteomics, metabolomics.

UNIT- V

15-18L

Application of genetic engineering – GMO, Transgenic animals, Transgenic Plants, Recombinant pharmaceuticals, Gene knockout technology
Gene Therapy- Vector Engineering, DNA fingerprinting, Human genome project, Antisense technology, Nanotechnology, Stem cell technology

Text/Reference books:

1. Molecular Biology of the Gene: Watson-Baker-Bell-Gann-Levine-Losick, 5thEdn., Pearson education
2. Molecular Biology: D. Freifelder, Narosa Publishing House, NewDelhi
3. Genome: T.A. Brown, John Wiley & Sons
4. Microbial Genetics: D. Freifelder, Narosa Publishing House, NewDelhi
5. Gene VII: Lewin Benjamin(Oxford)
6. Molecular Cell Biology: J.Darnell, H.Lodhis&D.Baltimore (W.H.Freeman&Co.)
7. DNA Repair & Mutagenesis: E.C.Friedberg, G.C.Walker and W. Seide (ASM Publisher)

M.Sc. Biotechnology
Second Semester
Paper 2.5MBT 5205 -Lab Course-III
Practical Exercises

1. Isolation of total DNA.
2. Isolation of plasmid and its quantification.
3. Preparation of competent cells
4. To induce mutation by UV radiations and to exhibit DNA repair by photo reactivation.
5. To isolate and produce UV induced auxotrophic mutants by replica plating method.
6. To perform Ames test for detecting carcinogen or mutagen.
7. Quantification of DNA by DPA method.
8. Quantification of RNA by Orsinol method
9. To check purity and quantity of DNA by Spectrophotometric method.
10. Preparation of competent cells.
11. Sterilization techniques: Washing of glassware, dry and steam sterilization.
12. Preparation of culture Media. Stock solutions for MS media.
13. Micro propagation techniques. Hardening and transfer of plants to soil
14. Surface sterilization and Organ culture. Ovary culture
15. Study of somatic embryogenesis.
16. Anther culture, production of Haploids.
17. Demonstration of protoplast fusion employing PEG
18. To study the development and maintenance of animal cell line.
19. Studying cell death and cytotoxicity by staining methods
20. Differentiation of the viable and nonviable cell by staining methods.
21. Introduction to culture environment, medium and culture vessels for animal cell culture.
22. Preparation of culture media and concept of sterilization in animal cell culture.
23. Demonstration of establishment of primary cell culture by trypsinization
24. Identification of cell types by maceration method.
25. Preparation of metaphase chromosome from cultured cells.

M.Sc. Biotechnology
Second Semester
Paper 2.6MBT 5206-Lab Course-IV

Practical Exercises

1. Antibody titre by ELISA method.
2. Double diffusion, Immuno-electrophoresis and Radial Immuno-diffusion.
3. Immunoblotting, Dot Elisa assays

4. Blood smear identification of leucocytes by Giemsa stain.
5. Separation of leucocytes.
6. Blood group typing.
7. Blood film preparation and identification of cells.
8. MIC assay – Kirby Bauer method.
9. Isolation of serum from whole blood.
10. Bacterial culture and antibiotic selection media.
11. Isolation of plasmid DNA.
12. Isolation of phage DNA.
13. Restriction mapping of Plasmid DNA.
14. Cloning in Vectors.
15. PCR.
16. To study the production of transgenic crops for disease resistance.
17. To study the genetically modified crop plants production & their usefulness.
18. Restriction endonuclease digestions and separation of fragments.
19. RFLP analysis
20. Biosynthesis of nanoparticles.
21. Use to nanobiotechnology in various fields.

M.Sc. Biotechnology

Third Semester

Paper3.1 MBT-6301– Applied Plant and Animal Biotechnology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

Plant Transformation Technology: Features of Ti and Ri plasmid; mechanisms of T- DNA transfer, role of virulence genes; Vectors engineered from Ti plasmid, practical applications of *Agrobacterium* mediated gene transfer, Direct DNA transfer (particle bombardment, electroporation, microinjection) Transgene stability and gene silencing.

UNIT-II

15-18L

Application of plant transformation for productivity and performance: herbicide resistance, insect resistance with special reference to Bt genes, virus resistance, Use of antisense technology to prevent post-harvest losses and prolonging shelf-life of fruits (Flavr Savr tomato) and flowers, Production of vaccines/ plantibodies in GM plants, Terminator gene technology, Applications of genome editing.

UNIT-III

15-18L

Scaling up of cell cultures, measurement of viability and cytotoxicity, cell synchronization, bioreactors for animal cell cultures, scale up in monolayers, microencapsulation.

UNIT-IV

15-18L

Stem cell: Embryo stem cells and their application., Apoptosis, measurement of cell death, animal cloning and micromanipulation, Mapping of genome and genome sequencing. Marker assisted selection. Gene banking.

UNIT-V

15-18L

Application of Animal tissue culture- Cell culture-based vaccines, Ribozymes, Tissue engineering. Safety measures, hazards and ethics of animal cell culture. Biotechnological application in animal improvements (transgenic goat, sheep, mice, cattle, fish etc), *in vivo* and *in vitro* embryo production and preservation, DNA based diagnosis of genetic diseases, Human somatic cell gene therapy.

M.Sc. Biotechnology

Third Semester

Paper-3.2 MBT-6302 -Fermentation Technology,Biosafety and IPR

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

Isolation, screening, preservation and maintenance of industrial microorganisms. Novel microbes for future industry. Isolation and screening of the industrially important strain from diverse ecosystem. Method of strain improvement, mutagenesis, strain breeding by protoplast fusion, sexual and para sexual recombination. Microbial growth and death kinetics. Media for industrial fermentation: Input economizing, carbon, nitrogen, mineral sources, buffers, precursors, inhibitors, inducers and antifoam agents.

UNIT-II

15-18L

Basic design and operation of a microbial fermentor. Types of Fermenters. Basic principles of scale –up. Analysis of mixed microbial populations, Industrial sterilization process for media, air and equipment

Concept of submerged, surface, solid state fermentation, Batch and continuous Fermentations.

UNIT-III

15-18L

Downstream processing: Biomass separation by centrifugation, filtration, flocculation and other recent developments.

Cell disintegration: Physical, chemical and enzymatic methods, Extraction: Solvent, two phase, liquid extraction, whole broth, aqueous multiphase extraction. Purification by different methods. Concentration by precipitation, ultra-filtration, reverse osmosis. Drying and crystallization.

UNIT-IV

15-18L

Introduction to biosafety: Biosafety issues in biotechnology – risk assessment and risk management – safety protocols: risk groups – biosafety levels – biosafety guidelines and regulations (National and International), types of biosafety containment. The Cartagena protocol on biosafety, Benefits and risks of genetic engineering, ethical aspects of genetic testing, ethical aspects relating to use of genetic information, genetic engineering and biowarfare, GM crops and GMO's and biopiracy

UNIT-V

15-18L

Introduction to intellectual property and intellectual property rights: Types, patents, copy rights, trade secrets and trademarks, design rights, geographical indications, Importance of IPR Patent claims, the legal decision-making process. Basic requirement of patentability, Special issues in Biotechnology Patent: Disclosure Recruitment, Ethical issues, Plant Biotechnology-UPOV and Plant breeder's rights, case studies/experiences from developing and developed countries, IPR issues in the Indian context.

M.Sc. Biotechnology

Third Semester

Elective I

Paper3.3 MBT-6303 (1)– Environmental Biotechnology

Contact Hours / Week : 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination : 3 Hours	Continuous/Internal/Assessment	: 30 Marks
	Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

Environmental biotechnology: Current status of biotechnology in environmental protection. Pollution (Air, Soil, Water) - its causes and consequences. Waste water- its types and sources. Methods of waste water treatment. Eutrophication and algal blooms. Solid waste- sources, types and characterization. Biomedical waste and its disposal.

Biomonitoring: Objectives, Parameters for biomonitoring. Micro-organisms, lower plants, higher plants, chromosome and human system as indicator of pollution. Applications of bioindicators. Spiderwort strategy for detection of low level atomic radiation.

UNIT- II

15-18L

Sustainable development - concept and strategies. Concept of clean technology. Green technologies and their applications. Microbial biofertilizers- types, sources and their commercial production. Mycorrhizae (VM) and their significance. Rhizobia and other symbiotic and nonsymbiotic nitrogen fixing microbes and their role in crop productivity. Azolla as biofertilizer and its commercial production. Significance and application of Phosphate Solubilizing Bacteria (PSB) and Plant Growth Promoting Rhizobacteria (PGPR).

UNIT-III

15-18L

Bioremediation Introduction, Methods of Bioremediation (*In Situ* and *Ex Situ* Methods). Applications of Bioremediation. Nanotechnology in bioremediation, Phytoremediation- Concept and applications. Microbes and their genetic engineering for degradation of environmental pollutants. Xenobiotics in environment. Biodegradation of Hydrocarbons, Substituted hydrocarbons, Surfactant, Pesticides, Lignin, Tannin, Synthetic dyes.

UNIT-IV

15-18L

Biosorption and Bioleaching of heavy metals: Cadmium, Lead, Mercury, Metal binding targets and organisms, Metal microbial interaction, Biomethylation of elements (Methylation of

mercury and arsenic), Commercial biosorbants, bioleaching, metal precipitation, advantages and disadvantages of bioleaching.

Biom mineralization: Modes, Biom mineralization of metals-iron, zinc, copper, gold.

Bioaccumulation: Bioaccumulation process-uptake, storage, elimination, state of dynamic equilibrium. Factors affecting bioaccumulation.

UNIT-V

15-18L

Biopesticides- definition, significance, types, sources, commercial production, use and mode of action. Entomopathogenic fungi and viral insecticides. Significance of *Bacillus thuringiensis* as biocontrol agent. Biomagnification of pesticides and heavy metals. Consequences of biomagnification.

Microbes as biological weapons. Role of microbes in production of biofuels. Biogas production and factors affecting methane formation. Biosensors- principle and working. Applications of biosensors in environmental monitoring.

11. Martin Alexander. Biodegradation and Bioremediation. Academic Press; 2nd edition (April 15, 1999) ISBN: 0120498618.
12. Ecotechnology for pollution control & environmental management - By R.K. Trivedi & Arvind Kr.
13. Basic Environmental Technology - J.A. Nathanso
14. Environmental Biotechnology, Bimal C. Bhattacharya and Rintu Banarjee, OUP India Publishers

imprinting. Drug delivery systems- criteria for drug delivery systems, drug delivery carriers, controlled release mechanisms, administration routes.

UNIT II

15-18L

Techniques for disease diagnosis: Prenatal diagnosis; pre-implantation genetic diagnosis; invasive techniques- amniocentesis, fetoscopy, chorionic villi sampling (CVS); non-invasive techniques- ultrasonography, X-ray, TIFA, maternal serum screening and fetal cells in maternal blood. Diagnosis using protein and enzyme markers. Diagnosis using monoclonal antibodies- hormonal disorders & infectious diseases. DNA/RNA based diagnosis. Microarray technology- genomic and cDNA arrays, application to disease diagnosis. Genetic counselling.

UNIT III

15-18L

Therapeutics and Management of diseases: Gene therapy- *Ex-vivo*, *In vivo*, *In situ* gene therapy; Strategies of Gene Therapy- Gene augmentation, Prodrug therapy/Suicide gene, TFO, Antisense therapy, SmART therapy, Ribozymes, Protein aptamers, Intrabodies. Vectors used in gene therapy: Biological vectors, Synthetic vectors.

UNIT IV

15-18L

RNA interference and its applications in prevention of cancer and generation of antiviral drugs; Therapeutic genome editing. Enzyme therapy, Hormone replacement therapy, Cytokine therapy. Pharmacogenomics; Benefits of pharmacogenomics. Vaccines- Live, killed, Subunit, Attenuated, DNA, Peptide vaccines and Dendritic cell vaccines.

UNIT V

15-18L

Regenerative medicine: Stem cells in therapy: Therapeutic proteins, interleukins, interferons principle, production and application. Cell and tissue engineering- Characteristics of cells involved in tissue engineering; Types and characteristics of biomaterials. Bioartificial organs (Liver, Heart auricles, Blood vessels & Skin). Nanomedicine: Nanomaterials in medicine, nano robots, DNA based nano devices; Nanomedicine in cancer.

Suggested Readings:

1. Introduction to Human Molecular Genetics- J.J Pasternak, John Wiley Publishers
2. Human Molecular Genetics- Tom Strachen and A P Read, Bios Scientific Publishers
3. Human Genetics Molecular Evolution- Mc Conkey
4. Recombinant DNA Technology- AEH Emery
5. Principles and Practice of Medical Genetics, I, II, III Volumes by AEH Edts. Emery
6. Medical Biotechnology- Pratibha Nallari, V. Venugopal Rao- Oxford Press
7. Medical Biotechnology 1st Edition- Judit pongracz, Mary Keen
8. Medical Biotechnology by Bernard R. Glick, Terry L. Delovitch, Cheryl L. Pattern. ASM press, 2014
9. Molecular Biotechnology-Principles and Applications of Recombinant DNA- 4th Edition by Bernard R. Glick, Jacq J. Pasternack, Cheryl L. Pattern

3. Campbell AM & Heyer LJ, Discovering Genomics, Proteomics and Bioinformatics, 2nd Edition. Benjamin Cummings 2007
4. Primrose S & Twyman R, Principles of Gene Manipulation and Genomics, 7th Edition, Blackwell, 2006.
5. Glick BR & Pasternak JJ, Molecular Biotechnology, 3rd Edition, ASM Press, 1998.

M.Sc. Biotechnology

Third Semester

Paper 3.5 MBT 6305 Lab Course V-Practical Exercises

1. Micronucleus test.
2. Immunofluorescence detection to check transfection efficiency (using fluorescence and confocal microscopes)
3. Callus induction & Production of secondary metabolites.
4. Preparation of synthetic seeds.
5. Induction of hairy root cultures using *Agrobacterium rhizogenes* for the production of secondary metabolites
6. Preparation of recombinant plant expression vector with gene of interest
7. Genetic transformation of plant tissue using *Agrobacterium tumefaciens*.
8. Confirmation of transgenic plants by PCR and southern blotting techniques

9. Instrumentation of fermentor: Design of various types of fermentors & bioreactors.
10. Operation of fermentor.
11. Batch fermentation in conical flask
12. Solid state fermentation
13. Screening of microbes for production of industrially important enzymes.
14. Optimization of conditions for optimal production: - Media composition, Incubation temperature, Aeration, Incubation time.
15. Determination of TDP of an organism.
16. Determination of TDT of an organism.
17. To demonstrate DSP.
18. Searching of India Patent databases
19. Drafting and filing of Indian Patent databases
20. Searching of International Patent application
21. Drafting and filing of International Patent application

M.Sc. Biotechnology
Third Semester
Paper 3.6 MBT 6306 Lab Course VI

Practical Exercises based on Environment Biotechnology

1. To estimate total hardness of water
2. To estimate Calcium hardness of water
3. To estimate the total solids (TS), total dissolved solids (TDS) and suspended solids (SS) in the given water sample
4. To estimate dissolved oxygen content of wastewater.
5. To estimate chemical oxygen demand of the given sample.
6. To estimate Biological Oxygen Demand (BOD).
7. To measure the concentration of chloride in the given sample.
8. To measure the Sulfite content in the given sample by iodometric titration.
9. Practical based on soil bioremediations.
10. Detection of coliforms for Determination of the purity of potable water.
11. Preparation and formulation of Microbial Biopesticides
12. Visit to waste water treatment plant.

Practical Exercises based on Stem cells & Healthcare

1. Establishment of embryonic stem cells (ESCs).
2. Characterization of pluripotent stem cells (PSCs).
3. Somatic cell reprogramming using TFs.
4. Intestinal stem cells and dedifferentiation.
5. Homeostasis by stem cell proliferation and differentiation.
6. Lung stem cells and dedifferentiation.
7. Tissue-specific stem cells and differences among different tissue.
8. Tools to study stem cell Biology.
9. Bioethics and ethical issues related to stem cells.
10. Guidelines to follow regarding stem cell Biology.

Practical Exercises based on Medical Biotechnology

1. Genotyping of candidate genes for diseases by RFLP, Microsatellite & VNTR analysis
2. Screening for known mutations by ARMS-PCR/ASO.
3. Screening for unknown mutations by SSCP and sequencing.
4. Detection for dynamic mutations- Trinucleotide repeat polymorphism.
5. Identification of disease gene expression by Real-time PCR.
6. Sequencing of cDNA and cloning in expression vectors.
7. Detection of congenital abnormalities by triple test.
8. Preparation of Ag nano particles and testing their antimicrobial effect.
9. Encapsulation of lymphocytes/ RBCs.

Practical Exercises based on Genomics & Proteomics

1. Use of SNP databases at NCBI and other sites
2. Use of OMIM database
3. Detection of Open Reading Frames using ORF Finder
4. Proteomics 2D PAGE database
5. Softwares for Protein localization.
6. Native PAGE
7. SDS-PAGE

M.Sc. Biotechnology

Fourth Semester

Paper 4.1 MBT-6401– Industrial Bioprocess Technology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT I

15-18L

Conventional fermentation v/s biotransformations; Introduction to bioprocess engineering and technology. Effluent treatment and disposal. Application of computers in bioprocess engineering: data logging, analysis and control., Material balance in biological systems, energy balance in biological system.

Microorganism in agriculture biosafety- Biofertilizer and their application biopesticide and disease management, role of (Rhizobacteria, Azobacteria) for plant growth production and disease management.

UNIT II

15-18L

Industrial Production of Antibiotics – Penicillin, Streptomycin, Tetracyclines Organic acids – Citric acid, Lactic acid, Acetic acid and glutamic acid.; Enzymes – Amylases, Proteases, lipases; Amino acids – Lysine, Glutamic acid. Microbial Production of Ethanol, Vinegar, SCP, Vitamin B2 and B12.

UNIT III

15-18L

Fermented foods and beverages; fermentation as a method of preparing and preserving foods; microbes and their use in pickling, producing colours and flavours, Traditional fermented foods (Bread, cocoa, coffee, tea, sauerkraut, cheese, butter, yoghurt, meat, fish, etc.), alcoholic beverages (Beer, wine and whisky). Edible fungus: Mushrooms.

UNIT IV

15-18L

Applications of enzymes in food processing. Bioreactors in food fermentation; process wastes whey, molasses, starch substrates and other food wastes for bioconversion to useful products; bacteriocins from lactic acid bacteria – production and applications in food preservation. HACCP and hurdle technology. Hygiene and safety in fermentation industries. Sterilization and pasteurization of food products, Elementary idea of canning and packaging and food preservation.

UNIT V

15-18L

Protein engineering in food technology: methods, targets and applications in foods. Applications of Biochips and biosensors. Microbial production of vaccines, microbial production of Alkaloids, Bioplastic, Biopolymers and therapeutic proteins. Microbial transformations: Steroid biotransformation. Biofuels and biorefinery.

M.Sc. Biotechnology

Fourth Semester

Paper 4.2 MBT-6402– Biostatistics, Bioinformatics & Research Methodology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

UNIT-I

15-18L

Principles and practice of statistical methods in biology; samples and populations; Data collection and graphical representation Measures of central tendency- mean, median, mode; Measures of dispersion- range, mean deviation, standard deviation, standard error, coefficient of variation

UNIT-II

15-18L

Probability: counting, conditional probability, discrete and continuous random variables; Error propagation; Populations and samples, expectation, parametric tests of statistical significance, nonparametric hypothesis tests, linear regression, correlation & causality, calculation of Karl-Pearson's coefficient of correlation; analysis of variance, factorial experiment design; Use of biostatistics software.

UNIT-III

15-18L

Bioinformatics: An overview, introduction and scope of bioinformatics. Databases: Characteristics, categories and types (Genome database, Literature database, Disease database, Sequence database, Structure database). Information retrieval system (Entrez, SRS), Data mining tools: Modelling tools (RasMol, PyMol and Hyperchem), Data submission tools (Bankit, Sequin, Webin, Sakura).

UNIT-IV

15-18L

Tools for sequence alignment. Tools for Genome analysis. Phylogenetic analysis: Phylogenetic trees. Methods of phylogenetic evaluation. Prediction tools Proteomics: Proteome analysis, Tools for Protein sequence analysis and proteomics, structure analysis: Insilico drug designing

UNIT-V

15-18L

Research Methodology: Introduction-Basic research, applied research, need based research. Identification of the problem, defining the problem. Research Project planning. Literature search-information sources, library resources-books, abstracts hand books, procedure manuals, encyclopedias, annual report, data banks, CDROMS, online literature search- internet access, websites, directories of information resources.

Progress of research- evaluation of results, statistical approach, comparison with existing methodologies, validation of findings, research communication, impact factor of journals, plagiarism. Art of scientific writing and editing. Thesis/Dissertation writing. Software packages for statistical analysis.

M.Sc. Biotechnology

Fourth Semester

Paper 4.3 MBT-6403 -Agriculture Biotechnology

Contact Hours / Week	: 4 Hours	Maximum Marks	: 100 Marks
Duration of Examination	: 3 Hours	Continuous/Internal/Assessment	: 30 Marks
		Semester Assessment	: 70 Marks

Note: The syllabus is divided into five independent units and question paper will be divided into two sections.

- **Section-A** will carry 20 marks with one compulsory question comprising ten short answer type questions taking two questions from each unit. Each question shall be of two marks.
- **Section-B** will carry 50 marks with equally divided into five long answer type. Paper setter shall be advised to set two questions from each unit and students are instructed to attempt five questions by selecting one question from each unit.

Note: Contents of each unit may be completed into 15-18 lectures or contact hours which also include revisions, seminars, internal assessments, etc.

Unit I

15-18 L

Concept, scope, and evolution of agricultural biotechnology, Role of genetics, molecular biology, and tissue culture, Gene transfer techniques: Agrobacterium-mediated, biolistics, electroporation, Genetically modified organisms (GMOs) in agriculture, Bioethics and public perception of

biotech crops, Marker-assisted selection (MAS), quantitative trait loci (QTLs) and molecular markers

Unit II

15-18 L

CRISPR/Cas9 and genome editing for crop enhancement, Promoters and vectors used in plant transformation, Biosafety regulations and ethical concerns in genetic engineering, Transgenic plants: traits for pest resistance, drought tolerance, enhanced nutrition

Unit III

15-18 L

GM crops and food security: case studies and regulatory aspects. Biotechnology in abiotic and biotic stress management. Biotechnology for post-harvest technology and food processing
Climate-resilient agriculture through biotechnological interventions

Unit IV

15-18 L

Genetic engineering of microbes for stress tolerance and plant growth promotion, Industrial and Emerging Trends in Agri-Biotech- Agricultural nanobiotechnology: nano-fertilizers, nano-pesticides, Synthetic biology in crop design, Metagenomics for soil microbial diversity analysis, Bioinformatics tools in agricultural genomics, Future perspectives: climate-resilient agriculture, vertical farming

Unit V

15-18 L

Molecular breeding, Application of bioinformatics tools in crop genome analysis, Bio-entrepreneurship, seed technology: seed production, quality control and storage.

Suggested Readings:

"Agriculture Biotechnology" by SVS Chauhan and Seeema Chauhan

"Plant Biotechnology" by Slater, Scott & Fowler

"Agricultural Biotechnology" by Arie Altman

Research papers and government policy documents on GM crops and biosafety

M.Sc. Biotechnology
Fourth Semester
Paper 4.4 MBT 6404- Lab Course VII

Practical Exercises

1. Immobilization of cells and enzymes.
2. Instrumentation of fermenter. Design of various types of fermenters & bioreactors
3. Production of Beer / wine.
4. Demonstration of Plackett Burman design for formulation of fermentation media.
5. Pigment production and isolation from a microbial source (yeast, fungi or bacteria)

6. Physico chemical characterization of an industrial effluents.
7. Detection of different food enzymes by simple tests (amylase, catalase, invertase, papain, pectinase, pepsin).
8. Microbial fermentations for the production and estimation (qualitative and quantitative) of:
 - i. Enzymes: Amylase and Protease and cellulase.
 - ii. Amino acid: Glutamic acid.
 - iii. Organic acid: lactic acid/ Acetic Acid
 - iv. Alcohol: Ethanol (yeast / wheat flour)
9. A visit to any educational institute/industry to see an industrial fermenter, and other downstream processing operations.
10. Study of pickling process (sauerkraut /pickled cucumbers) with respect to physical, chemical/biochemical and biological changes occurring during the pickling process.
11. Production of Single Cell Protein.
12. Production of Yoghurt.
13. Mushroom cultivation.
14. Introduction to Food Technology: Sterilization and Pasteurization of Food Products
15. Technology of Fermented Food products.
16. To access scientific data from Literature data bases (PUBMED, LITDB, Medline)
17. To access nucleic acid databases for retrieval of gene sequence.
18. To access protein databases for retrieval of amino acid sequence of target protein.
19. To perform pair wise sequence alignment using Dot matrix.
20. To perform multiple sequence alignment using BLAST.
21. To prepare Phylogenetic tree using CLUSTAL-W
22. 3D protein structure prediction and structure refinement using Swiss-PDB viewer
23. Representation of statistical data by
 - a. Histogram
 2. O give curves
 3. Pie diagrams
24. Collection of data using different sampling methods
25. Determination of Averages or Central tendencies (Mean, Mode, Median)
26. Determination of measures of dispersion (Mean deviation, Standard deviation and Coefficient of variation, Quartile deviation)
27. Application of Tests of significance (Chi-Square test, student t-test, Standard error)
28. Applications of computers in biology using MS-office (MS-Word, Excel, Power point)
29. Isolation of Plant DNA & quantification by spectrophotometric method.
30. RFLP and RAPD analysis
31. RNA extraction, Agarose gel electrophoresis of RNA, RT-PCR analysis of a plant gene.
32. Polymerase chain reaction to amplify a plant gene.
33. Rapid screening tests for abiotic stress tolerance (drought, salinity - PEG, Mannitol & NaCl)
34. Surface-sterilization of seeds, establishment of axenic plants, acclimatization of tissue culture plants and establishment in greenhouse.
35. Seed germination test and purity analysis

M.Sc. Biotechnology

Fourth Semester

Paper 4.5 MBT-6405– Dissertation

A dissertation shall be initiated at the end of the Semester III and continued during Semester IV. A dissertation may be undertaken in any research laboratories/industries/university department. Project work will involve experimental work and the student will have to complete this in stipulated time i.e 3 months. The final evaluation of the project work will be through a Panel involving internal and external examiners. The students shall compulsorily submit the certificate of completion and report to the Department during the practical examination. This process includes: Conceptualization of the independent research, Collection, analysis, and interpretation of data, Thesis writing, Oral presentation of findings, Viva-Voce.

The marks will be awarded by the external examiner on the day of the practical examination on the basis of the experimental, presentation and viva-voce. The distribution of marks for project work will be:

Project work : 200 Marks

Experimental Work & Thesis : 100

Research work presentation :50

Viva-voce :50
