

EXAMINATION SCHEME

M.Sc. Information Technology Exam.-2020-21

(Applicable for students admitted in the session 2020-21)

Semester - I

Courses of Study and Examination

Paper	Paper Name	Lecture Hrs./week	Tut.	Credits	Max. Marks
PAPER-101	Algorithmic and Application Programming	3	1	4	100
PAPER-102	Fundamentals of Information Technology	3	1	4	100
PAPER-103	Database Management System	3	1	4	100
PAPER-104	Operating Systems	3	1	4	100
PAPER-105	Mathematical Foundation of Information Technology	3	1	4	100
	Practical				
PAPER-106	Programming Laboratory ('C', Windows, MS-Office)			2	50
PAPER-107	Programming Laboratory (DBMS, Operating System)			2	50
	Total			24	600

*for each practical paper students have to submit the project.

Semester - II

Courses of Study and Examination

Paper	Paper Name	Lecture Hrs./week	Tut.	Credits	Max. Marks
PAPER-201	Object Oriented Concepts and Technology	3	1	4	100
PAPER-202	Computer Organization	3	1	4	100
PAPER-203	Internet and Web Technology	3	1	4	100
PAPER-204	Data Communication	3	1	4	100
PAPER-205	Advance Database Management System	3	1	4	100
Practical					
PAPER-206	Programming Laboratory-1			2	50
PAPER-207	Programme Laboratory -2 (Internet and Web Technology)			2	50
	Total			24	600

*for each practical paper students have to submit the project.

Semester - III

Courses of Study and Examination

Paper	Paper Name	Lecture Hrs./week	Tut.	Credits	Max. Marks
PAPER-301	Advanced Internet Application	3	1	4	100
PAPER-302	Visual Basic Programming	3	1	4	100
PAPER-303	Electronic Banking & E-Commerce	3	1	4	100
PAPER-304	Elective	3	1	4	100
PAPER-304.1	Data Warehousing & Mining				
PAPER-304.2	Cloud Computing				
PAPER-305	Cyber Law, Internet Security & Cryptography	3	1	4	100
Practical					
PAPER-306	Programming Laboratory (Visual Basic Programming)			2	50
PAPER-307	Programming Laboratory (Advanced Internet Application)			2	50
	Total			24	600

*for each practical paper students have to submit the project.

Semester - IV

Courses of Study and Examination

Paper	Paper Name	Lecture Hrs./week	Tut.	Credits	Max. Marks
PAPER-401	Project (Report, Viva-Voce)			24	600
	Total				600

Grand Total of All 4 Semesters: 2400

Note:

1. Project can be accomplished in a group of maximum 03 students.
2. Project work of students shall be assessed by a panel of External Examiner (appointed by University) and Internal Examiner both.

M.Sc. (Previous)
INFORMATION TECHNOLOGY
SEMESTER I

Paper 101-Algorithmic and Application Programming

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Algorithmic Methodology.

Basic concepts and notation, understanding the Problem, Plan the Logic, Code the Program, Pseudopodia and Flowchart, efficiency of algorithms, analyzing algorithms and problems, complexity measures, basic time analysis of an algorithm, space complexity. Conditionals Control Structures and Program Writing.

Unit-II

Looping, Abstract data types, Data abstraction and basic data structures, data types, Recursion, Characteristics of Recursive functions, Mathematical Induction, Propositional Logic, First Order Predicate calculus, Resolution Proofs, Rules of Inference.

Unit-III

Data Structure and Programming concepts:

Arrays, Storage allocation functions, Linked allocation, hashed allocation techniques, Sorting, Searching, Sequential, Binary and hashed searching,

Unit-IV

Internal and external sorting techniques, Bubble sort, Insertion sort, Selections sort, Merge sort, Radix sort and quick sort comparisons, String Manipulations, Representation of strings in contiguous storage, string conversions. Representations of variable-length strings, examples of operations on strings.

Unit-V

Data structures and file handling: File organization, text and Binary files., Opening and closing files, Advanced programming concepts, Introduction only, Recursion, dynamic Memory management and allocation operating system calls inter process communication, advanced file handling and indexing.

Text / Reference Books:

1. A.V.Aho, J.E. Hopcroft, and J.D.Ullman, Data Structures and Algorithms. Pearson Education Asia.
2. R. Johnsonbaugh, Discrete Mathematics, Pearson Education Asia.
3. Sara Baase and Allen Van Gelder-Computer Algorithms, Pearson Education Asia.
4. Jean-Paul Tremblay and Paul G. Sorenson, An Introduction to Data Structures with Applications, TMH Publishing Co. Ltd.

Paper 102 - Fundamentals of Information Technology

Max Marks: 100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Information systems, Data and Information, IT in Business and Industry, IT in home and Play, IT in education and training, IT in entertainment and the Arts, IT in Science, Engg. and Maths, Personal, Social and ethical issues in IT. Overview of the Digital Computer System (Processor, Memory, Input and Output Devices, Storage Devices, Operation Systems, Application Software, Types of Computers)

Unit-II

Representation of Data

Number system (binary, octal, decimal and hexa decimal numbers, conversion from one form to another, fractional numbers and signed numbers, complements, Fixed point and floating Point representations, Boolean algebra (addition, subtraction, multiplication and division), Logic Gates (NOT, OR, AND, NAND, NOR, XOR, XNOR)types of codes (ASCII, EBCDIC, Unicode), encoding and decoding.

Unit-III

Anatomy of a Computer

Introductory level: Emphasis shall be on basic concepts, features available in the component, characteristics and behavior of components, comparison, merits and limitations. Mother Board (Special reference to Intel 810 Chipset motherboard), CISC Micro Processors (Special reference to Pentium, AMD, Cyrix), RISC processors (Motorola; Power PC, and 680x0 series), Memory (ROM, RAM, flash, Cache, Virtual, Buffers, CMOS).

Unit-IV

Types of RAM (FPM, EDO, BEDO, SDRAM), types of memory modules (SIMM, DIMM), System clock Bus(Data, Address, Control), Bus architecture (ISA, MCA, EISA, PCI, AGP) Expansion slots and cards (Network adapter cards, SCSI card, Sound card, TV tuner card, PC card), Ports (Serial, Parallel, AGP, UGP, Fire wire), cables (RS 232, BIN), Input devices (keyboard, mouse, trackball, track pad, pen touch screen, scanner, OMR, OCR, voice input, video input digital camera) Output devices [Monitors (refresh rate, resolutions, standards- CGA, VGA, SVGA, XGA, SXGA; LCD monitors, Video controllers and VRAM), (Printers (Dot-matrix, Line, Label, Ink- Jet, Laser, Color Laser thermal wax, dye sublimation, fiery, IRIS), Plotters (pen, Ink- Jet, electrostatic), Voice Output], Storage devices [Storage types (Magnetic, Optical, Magneto-optical, Solid state), random versus sequential access, formation, tracks and sectors, speed storage, capacity, floppy Disk (5.25 inch, 3.5 inch; 2HD, Zip, Super disk, HiFD) Hard Disk (tracks, cylinders, sectors; Hard Drive Interfaces(IDE,EIDE, Fast SCSI, Fast/wide SCSI, Ultra SCSI; Hard Disk Cartridges, RAID)), Optical Disks (pits and lands, CD (ROM, R, RW), DVD, (ROM, R, RAM) Magnetic tape (reels, streamers, DAT, DLT, stripe, Smart Card), Modem (Fax/Data/Voice).

Unit-V

Development of Indian Supercomputer 'PARAM': history, characteristics, strengths & weaknesses and basic architecture.

E-Commerce: An Indian perspective, Digilocker, attendance.gov.in, mygov.in, Swachh Bharat Mission, E-Hospital, National Scholarship portal, E-Sampark, UID, various modes of Digital payment of govt. of India

Text / Reference Books:

1. Bernard Grob: Basic Electronic, Tata McGraw Hill.
2. Albert Paul Malvino, Electronic Principles, McGraw Hill.
3. Jacob Millman and Christos, C. Halkias: Electronic Devices and Circuits, Tata McGraw Hill Publishing Company Ltd., 2000.
4. Peter Norton's Introduction to Computers, Third Edition, McGraw Hill.

Paper 103 - Database Management Systems

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Data and Information

Basic Concepts, Problems of Early Information Systems, Advantage of a DBMS. Database Architectures Three levels of the architecture: external, conceptual and internal level] centralized and distributed, Database models : hierarchical [Concepts of a Hierarchy, IMS hierarchy], relational [Concepts of relational model, relational algebra, relational calculus].

Unit-II

Concepts of a Network, DBTG Network DBA Schema declaration and object oriented database [Only basic information about OODBMS and ORDBMS]. Data management Issues: Backup, recovery, maintenance and performance.

Unit-III

Database query languages

Basic retrieval capability, retrieval and exploration, update commands QBE, client/server design, Standard Query language [Basic SQL Query Nested Queries, Aggregate Operators, Null Values, Embedded SQL, Cursor Dynamic SQL] query optimization [Query evaluation plans, pipelined evaluation. Heritor interface for operators and access methods, relational Query Optimizer].

Unit-IV

Database Design

Schema Refinement, Functional Dependencies, Normal forms Decompositions. Normalization, tuning [Tuning indexes, Tuning queries and views, tuning the conceptual schema, DBMS benchmarking], Security [Access control, Discretionary and Mandatory Access control, Encryption] and implementation.

Unit-V

Enterprise wide data applications [Information only], building client / server database [Information only] Object oriented databases, [Information only] Internet databases [Information only] Open database connectivity [ODBC] [Information Only], Accessing remote data sources, Transaction Management [Information only].

Database and Tools:

MS-Access, SQL, Visual Basic, ORACLE (Wherever required these tools should be used).

Text / Reference Books:

1. Ramakrishnan and Gharke, Database Management Systems, Tata McGraw Hill Pub. Co. Ltd.
2. Date, Database Management Systems, Pearson Education Asia.
3. Gerald V Post, Database Management Systems, Tata McGraw Hill.
4. Leon and Leon, SQL, Tata McGraw Hill Pub. Co. Ltd.
5. Ivan Bayross, Database Technologies, Sybex Computer Books Inc.
6. Abbey and Corey, Oracle 8i, Tata McGraw Hill Pub. Co.Ltd.
7. Val Occardi, Relational Database, BPB Publication.

Paper 104 - Operating Systems

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Operating Systems

Functions of operating systems, characteristics of Operating Systems (single/multi user, single/multi tasking, portability), Information Management (File Systems, Device Drivers, Terminal I/O). **DOS:** Booting sequence, system files and commands, file and directories, overview of MS-DOS commands – internal and external commands, FDISK and Disk organization.

Unit-II

Process Management (Process definition, control, interacting processes, implementation of interacting Processes, threads, scheduling) Memory Management (Contiguous, Non-Contiguous, Paging, Segmentation, Virtual memory), Deadlocks, Security and Protection, Parallel Processing.

Unit-III

Windows

Graphical User Interfaces, Windows 98 Installation, Scan Disk, Task Bars, Toolbars, Settings, Control Panel, Files and Folders management, Windows Explorer, Installing and Running Program, Using Accessories, Getting Help; Copying, Moving and Sharing Information between programs, Backing up files, Configuring keyboard and mouse, adding and removing hardware, setting up printers and fonts, working with sound, graphics and video.

Unit-IV

Configuring windows by using the Accessibility Wizard, configuring modem, connection to PPP and SLIP Accounts, creating Windows Peer Network, Connecting Windows 98 PC to Novell Netware and Windows NT Networks, Sharing drive and printers, compressing disk and partitions. Tuning Windows 98 for maximum performance, registering programs and file types, troubleshooting Windows 98.

Unit-V

UNIX

Logging in and out, Directory, Redirecting input and output, cat command, viz Editor, Shell Scripts, Shell and sub-shell variables, Meta characters, sort, head, tail, split, cut, paste, find, tr, dd commands, grepping and sedding, UUCP, Unix and Networking, Accessing the Internet, Unix system administration, shell programming.

Text / Reference Books:

1. Gary Nutt : Operating Systems- A Modern Perspective (1st Edition) TMH 2000
2. DM Dhamdhare : Systems Programming and Operating Systems (Second Edition), Tata McGraw Hill Pub.Co.Ltd.2000.
3. Stuart E. Madnick, John. J. Donovan: Operating Systems, Tata McGraw Hill Pub.Co. Ltd.,2000.
4. Achyut S Godbole: Operating Systems, Tata McGraw Hill Pub. Co.Ltd. 2000.
5. Harvey M. Deitel, Operating Systems, Pearsons Education, 2001.
6. Tanenbaum AS, Modern Operating Systems, PHI Publications.
7. Ritchie : Operating Systems, BPB Publications.
8. Paul McFedries, Windows 98 Unleashed, Techmedia.

Paper 105 - Mathematical Foundation of Information Technology

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Number Systems : natural numbers, integers, rational numbers, real numbers, complex numbers, arithmetic modulo a positive integer (binary, octal, decimal and hexadecimal number systems), radix representation of integers, representing negative and rational numbers, floating point notation.

Unit-II

Binary Arithmetic, 2's complement arithmetic, conversion of numbers from one of binary/octal/decimal/hexadecimal number system to other number systems, Codes (Natural BCD, Excess-3, Gray, Octal, Hexadecimal, Alphanumeric-EBCDIC and ASCII), Error codes.

Unit-III

Logic and Proofs: Conjunction, Disjunction, Negation, Compound proposition, Condition, Propositions (Hypothesis, Conclusion, necessary and sufficient condition and Logical equivalence, De Morgan's laws, quantifiers, universally quantified statement, component of mathematical system (axiom, definitions, undefined terms, theorem, lemma and corollary), proofs (direct proofs, Indirect Proofs, proof by contra- positive), valid argument, deductive reasoning, modus ponens (rules of inference), universal instantiation, universal generalization, existential instantiation, universal generalization resolution, principle of mathematical induction, structural induction.

Unit-IV

Sets, Venn diagrams, ordered pairs, sequences and string, relation (reflexive, symmetric, anti-symmetric, transitive, partial order), inverse relation and composition of relations, relational database, functions (injective, surjective, bijective), composition of functions, restriction and function overriding, function spaces, lambda notation for functions, lambda calculus, equivalence relations, interpretation using digraphs, cardinal, countable and uncountable sets, infinite cardinal numbers, Russell's paradox:, operations on cardinals, laws of cardinal arithmetic.

Unit-V

Graph theory undirected graph, digraph, weighted graph, similarity graphs, paths and cycles, Hamiltonian cycles, shortest path algorithm, isomorphism of graphs, planar graphs.

Trees, characterization of trees, spanning trees, breadth first search and depth first search method, minimal spanning trees, binary trees, tree traversals, decision tree and the minimum time for sorting, isomorphism of trees.

Reference Books:

1. C.L. Liu: Elements of Discrete Mathematics, Tata McGraw hill Publishing Company Ltd. 2000
2. Richard Johnsonbaugh-Discrete Mathematics, Pearson Education, Asia, 2001.
3. John Truss: Discrete Mathematics for computer Scientists, Pearson Education, Asia. 2001.
4. Robert, J. Mc. Eliece: Introduction to Discrete Mathematics, Tata McGraw Hill, India.

Practical

Paper 106 Programming Laboratory -1 Max Marks 50 ('C', Windows, MS-Office)

Paper 107 Programming Laboratory -2 Max Marks 50 (DBMS, Operating System)

M.Sc. (Previous)
INFORMATION TECHNOLOGY
SEMESTER II

Paper 201-Object Oriented Concepts and Technology

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Basic Concepts Of Object Oriented Programming, Characteristics Of Object- Oriented Languages.

Unit-II

Object, Classes in C++, Constructors, Destructors, Complex Class, Matrix Class, Object and Memory; Structures and Classes; Static Class.

Unit-III

Copy Constructor, Data Conversion Between Objects of Different Classes, Data Structure through C++, Handling Data Files(Sequential and Random), Opening and Closing Files.

Unit-IV

Stacks and Queues, Linked Lists, Trees, Inheritance: Multiple, Private and Protected Inheritance, Virtual Functions, Objects Slicing.

Unit-V

Input/output in C++, User Defined Manipulators, Predefined Stream Objects, File I/O, With Streams, Str streams, Classes Within Classes, Smart Pointers, Templates, Exception Handling.

Text / Reference Books:

1. Deitel and Deitel : how to Program C++, Addison Wesley, pearson education Asia, 1999.
2. AM Bermans, data Structures via C++, Oxford University Press.
3. KR Venugopal, Rajkumar, T Ravishankar: Mastering C++, Tata McGraw Hill, India.
4. M Litvin, G.Litvin, Programming in C++, Vikas Publishing House, 2001

Paper 202-COMPUTER ORGANIZATION

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Basic computer organization: Arithmetic, logic, control and memory units, Internal representation of information, characters and codes, Memory access, contents reading and writing, Machine cycle and machine language. Register transfer, input and output units conversational devices.

Unit-II

CPU and control Architecture: Basic architecture of a CPU, instruction format, Fetch and execute cycles, Addressing modes, Control unit architecture.

Unit-III

I/O architectures: characteristics of simple I/O devices and their controllers. Transfer of information among I/O devices, CPU, memory. Program controlled and interrupt controlled information transfers, Introduction to DMA and I/O channels.

Unit-IV

Memory organization: random access, serial access memories, Basic memory organization. Introductory concepts of virtual memory systems.

Unit-V

Introductory study of microprocessor organization. Basic architectural concepts about 8 bit microprocessor, Elementary concepts of time sharing and multi- programming.

Text / Reference Books:

1. Computer architecture and organization, Hayes, Tata McGraw Hill.
2. Computer architecture and Logic Design, Thomas C, Tata McGraw Hill.
3. Computer system Architecture, Morris Mano, Prentice Hall.

Paper 203-Internet and Web Technology

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

The web authoring tools, Web designing with HTML, DHTML, and Java Script.

Unit-I

HTML: Build HTML documents, View HTML document on different Web Browsers .

Organize information using list, Frame, table tags, Use HTML frames and tables for page layout.

Using hypertext links.

Unit-II

Creating style sheets, image tag, use of image tag, creating GIF and transparent images.create graphical elements for use on web pages: buttons, banners, navigation bars, background tiles.

Embed images and other multimedia.

Unit-III

Post information to HITTP server. Evaluate a document design for effectiveness usability and efficiency.

Using DHTML to create functionalities like animation, stages- based presentations, splash pages, pull-down menus, drop down menus, drag- drop techniques.

Unit-IV

Integrating Java Script with HTML and DHTML. Using Java Script Object Model, Java Script's Event System. Manipulating User defined objects and variables. Dynamically updating objects in a window, windows focusing and defocusing method. Using Java Script's time out Mechanisms and cookie Mechanism. Read and write cookies to store visitor's information.

Unit-V

Internet, applications of internet, internet Vs intranet, Addresses and names for the internet, Web Objects and sites, Web server, Proxy server, Web Browser. Search Engines and tools.

Text / Reference Books:

1. Elizabeth castro, HTML4, Pearson Education Asia.
2. D.S. Ray and E. J. Ray., Mastering HTML 4, Sybex Computer Books Inc.
3. Jeff Rule, DHTML., Tata McGraw Hill.
4. Joseph Schmuller, Dynamic HTML, Sybex Computer Books Inc.
5. Jason J Manger, Java Script essentials, Osborne McGraw Hill.
6. Joel Sarkar, Principal of Web Design, Thomson Learning.
7. Rajkamal, Internet and Web Technologies, TMH.

Paper 204 - DATA COMMUNICATION

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Network architecture, configuring network, network strategies, networks types, LAN, MAN and WAN basic concepts, Line configuration, topology, transmission mode, identify key, component of network, categories of networks, differentiating between LAN, MAN, WAN and internet, the OSI model, MAC protocols for high speeds LANs, MANs.

Unit-II

Data transmission [basic concepts, data communication systems serial data format encoded data formats, error detection and correction], information about microwave [electromagnetic spectrum, characteristics, use of Microwave in communication, FM Microwave Radio Repeaters].

Unit-III

Principles of Modulation, AM and FM Modulator Circuits, Pulse code Modulation, Base band Modulation, M-ary Pulse Modulation wave forms, Duo binary signaling and decoding, digital band-pass modulation, demodulation [basics of demodulation and detection, signals and Noise, detection of binary signal in Gaussian Noise, demodulation of shaped pulses, digital band pass demodulation].

Unit-IV

Satellite [Artificial satellites, geo-synchronous satellites, Look angles, Orbital classifications, Spacing and frequency allocation, multiple accessing, channel capacity] and optical fiber communication [basic concept of light propagation, fiber cables, optical fiber versus Metallic cable Losses, wave division multiplexing, fiber distributed data interface the fiber channel.

Unit-V

SONET, ISDN, ISDN services, subscriber access to ISDN, B channels, D channels, H channels, ISDN layers, BROADBAND ISDN] DSL [digital subscriber Lines:- HDSL, VDSL, SDSL, IDSL].

Text / Reference Books:

1. M.A. Miller, Data and network Communication, Thomson Learning.
2. Behrouz a Forouzan, Data communication at and networking, Tata McGraw Hill.
3. Bernard Sklar, Digital Communications, Pearson Education Asia.
4. Wayne Tomasi, Electronic Communications systems, Pearson education Asia.
5. Harley Hahn, The Internet Complete Reference Tata McGraw Hill.
6. Minoli, Internet, Intranet Engineering, Tata McGraw Hill Pub. Co. Ltd.

Paper 205 -ADVANCE DATABASE MANAGEMENT SYSTEM

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Distributed database design, architecture of distributed processing system, data communication concept, data placement, placement of DDBMS, and other components, concurrency, control and recovery, transaction management, need of recovery, recovery techniques, serializability, blocking, dead-locks, introduction to query optimization. security and integrity of database.

Unit-II

Oracle RDBMS: Overview of three tier client server- technology, Modules of Oracle & SQL * PLUS data types, constraints, Operators, DDL, DML, DCL, (CREATE, modify, Insert, Delete and Update; Searching, Matching and Oracle functions) SQL forms concepts, & Construction, creating default form, user-defined form, multiple- record form, Master-detail form. PL/SQL syntax, Data types, PL/SQL functions, Error handling in PL/SQL, package functions, Package procedures, oracle transactions, SQL Report Writer: Selective dump report, Master-detail Report, Control-Break Report, Test report. Stored procedures and functions: stored procedures, creation and execution of procedures & functions, stored functions and procedures.

Unit-III

Database triggers: Introduction, Use & type of database triggers, Triggers vs. Declarative Integrity Constraints, BEFORE Vs. AFTER Trigger combinations, creating a Trigger, dropping a Trigger.

Unit-IV

Developer 2000, working with forms, master forms, property class, master detail form, parameter passing in forms and reports.

Introduction to DB2 architecture, defining database, manipulating database, external views, DB2 internals, IMS architecture, IMS Physical database, IMS Logical database.

Unit-V

Introduction to RPG/400 programming, report heading, editing, eval expression, arithmetic functions, RPG/400 structure, operations for decision making, branching, looping control, sub-routines, array, table processing, RPG/400 functions, data validation, physical file maintenance.

Text / Reference Books:

1. Database Management System, Korth, Tata McGraw Hill.
2. Database Systems, Catherine Ricardo, Maxwell & Macmillan.
3. SQL complete Reference, Leon and Leon, Tata McGraw Hill.
4. Oracle Developers guide, Muller, Tata McGraw Hill.
5. SQL, PL/SQL Programming Language, Ivan Bayross, BPB Publications.
6. Commercial Application Development Using Oracle Developer 2000, Ivan Bayross, BPB Publications.
7. DB2 Developer's Guide, Mullins, BPB Publications.

**Paper 206 Programming Laboratory -1
(‘C++’, Oracle and My SQL)**

Max Marks 50

**Paper 207 Programming Laboratory -2
(Internet and Web Technology)**

Max Marks 50

M. Sc. (Final) Information Technology

Semester - III

301- Advanced Internet Applications Development and Current Issues in IT

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Introduction to VB script, the Request Object , the Response Object, Interacting with server object, session and Cookies, the sever Context Object, Web Site Development Tools.

Enterprise Java: Servlets, Java Server Pages, Remote Method Invocation, Java Beans, Java Security, Native Methods, Java Virtual machine, Features of Java Beans, application of Java Beans – COBRA, Architecture of COBRA.

Unit-II

EJB- Introduction Transaction Process, Models of Transco-Two Tier Architecture/ Three-Tier Architecture, Distributed Transaction Processing. EJB Server and client features, Building and development of EJBs, Design and Implementation of beans.

Unit-III

COM/DCOM- Introduction to COM Programming, COM Architecture, COM interfaces, class Factories, Types of COM Server, Active X Controls, Property Pages, Distributed Components.

Unit-IV

Active Server Pages - Components, Interfaces, ASP with Database, Connections, Data Sources, Record Sets, Command Objects, Full text search. ASP Custom Components, Creating Multi-tier Distributed Applications, Window DNA, Using ASP with MS Transaction Sever and Message Server.

CORBA- An Architecture of Interoperability, Internet Inter ORB Protocol. CORBA Filters and dynamic loaders, CORBA and Java servlets. CORBA Beans.

Unit-V

XML- The Purpose and Nature of XML, XML's syntax & structure rules, XML Document Type Declaration, XML's linking mechanisms, XML's style language, Converting HTML documents into XML documents.

Overview of JSP, Swing (JFC) Securities, JINI. Current Issue- Network Securities- IP and Web Security and Secure Transmission, Electronic, Biotechnological Issues. Authentication issues.

Text / Reference Books:

1. Patrick Naughton & Shildt Herbert : Java 2 : The Complete Reference; TMH, 4th Ed. 2001
2. Baartse: Professional ASP,XML; SPD Pub., Mumbai, 2001.
3. Minoli “ Internet & Internet Engineering”, TMH
4. Inside COM, Dale Rogerson , WP Publisher.
5. Corba Networking with Java (W/CD)by Doss.
6. Stephen W., “Active Pages Server: Unleashed”, Techmedia.
7. Mastering XML (M/CD) by Burman.

302 - VISUAL BASIC PROGRAMMING

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Introduction: Need of Visual Languages, Integrated Development Environment (IDE), Advantage of Visual Basic, Characteristics and Features of Visual Basic, Characteristics and Features of Visual Basic-IDE, Project, User Interface, Object Oriented, Visual Development and Event-Driven Programming, Forms/Graphic Controls, Data Processing, Sharing With Windows and Internet Applications.

Unit-II

Visual Basic Programming and Tools: An Introduction of Visual Basic Programming, Simple Program Construction, Statements, Input/Outputs, Comments, Editor, Subroutines, Control Flow Statements, Objects, and Variants. Visual Basic Debugging Tools, Runtime Error Handling.

Unit-III

Designing User Interface: Elements of User Interface, Understanding Forms, Menus and Toolbars, Designing Menus and Tool-Bars, Building Dynamic Forms, Drag-And- Drop Operations, Working With Menus, Customizing The Toolbars.

Unit-IV

Active X Controls- Textbox, Combo Box, Scrollbar and Slider Control Operations, Generating Timed Events, Drawing With Visual Basic Using Graphic, Controls, Coordinate Systems and Graphic Method, Manipulation Colors and Pixels With Visual Basic, Operations with Common Dialogs, Printer Object and Reports, Integrating With Microsoft Windows and Office 2000, Concepts Automation, ActiveX and Object Models, Automations With Word 2000, Excel 2000.

Unit-V

Database Programming With Visual Basic-Data Access Methods, Creating, Reading and Writing Text File, Data Control, Creating Queries.

Text / Reference Books:

1. Petroustos Evangelos : Mastering Visual Basic; BPB Publications; 1998.
2. Norton's Peter; Guide to Visual Basic; Techmedia; 1998.
3. Kurata Deborah: Doing Objects in Visual Basic; Techmedia; 1998.
4. Mastering Database Programming With Visual Basic 6 by Petroustos.

303 ELECTRONIC BANKING AND E-COMMERCE

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Electronic Commerce Framework, Electronic and Media Convergence, Traditional Vs. Electronic Business Applications, the Anatomy of E-Commerce Application, Overview Of Mobile Computing Technology, Mobile Data, Internet and Mobile Computing Applications.

Unit-II

Networks Security and Firewalls: Client Server, Network Security, Threads, Firewalls and Network Security, Data Message Security, Encrypted Document and Electronic Mail.

Unit-III

Architectural Framework for Electronic Commerce, World Wide Web As Architecture, Consumer Oriented E-Commerce, Electronic Data Interchange (EDI), EDI Applications In Business, EDI Security, Document Management and Digital Libraries.

Unit-IV

Consumer-Oriented Applications, Mercantile Process Models, Mercantile Models from the Consumer's Perspectives, Mercantile Models from the Merchant's Perspective.

Unit-V

Types Of Electronic Payments Systems, Digital Token Based Electronic Payment Systems, Smart Cards and Electronic Payment Systems, Credit Card-Based Electronic Payment and Security Issues and Measures, Designing Electronic Payment System.

Text / Reference Books:

1. R Kalakola And A.B. Whiston : Frontiers Of Electronic Commerce: Addison Wisely, 1996
2. R. Kalakola And A.B. Whiston : Reading In Electronic Commerce: Addison Wisley, 1997
3. Soka : Form EDI To E-Commerce; Mcgraw Hill, 1995.
4. Greensein, Feinman: Electronic Commerce Security, Risk Management And Control; TMH, 2000.
5. Saily Chan: Electronic Commerce Management: John Wisely; 1998.
6. David Kosiur: Understanding Electronic Commerce, Microsoft Press., 1997.
7. Kamlesh K. Bajaj & DebJani Nag, E-Commerce, The Cutting Edge Of Business, Tata Mcgraw Hill.
8. Pete Locuin and A. Murphy, Electronic Commerce, A Jaico Book.
9. Green Stein" Electronic Commerce", TMH.

Paper 304.1

DATA WAREHOUSING AND MINING

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Data Warehousing: Introduction To Data Warehouse, Data Warehouse Uses, Data Warehouse Planning, Stages and Designing Approaches, Delivery Process –Data Warehouse Delivery Methods.

System Process: Data in Flow Process, Extract and Load Process Clean and Transform Process, Backup and Archive Process and Query Management Process. Process Architecture, Load Manager, Warehouse Manager, Query Manager.

Unit-II

Database Scheme: Star Flake Scheme, Identifying Facts and Dimension, Designing Fact Tables and Dimension Tables, Designing Star Flake Scheme Multi-Dimension Schemas. Horizontal and Vertical Partitioning, Hardware Partitioning. Aggregation and Aggregation Summary Tables. Data Marts, Designing Data Marts. Metadata- Data Transformation and Load, Data Management, Query Generation, Metadata and Tools, Data Warehouse Process And Load Managers.

Unit-III

Hardware Architecture: Process, Server, Network and Client Hardware, Physical Layout Parallel Technology, Disk Technology, Contents of Data Warehouse, Database Structure and Layout and File Systems.

Unit-IV

Security: Security Requirements, Impact of Security on Design and Performance, Backup Strategies and Disaster Recovery. Service Agreement and Operations of Warehouse. Capacity Planning (Process, Estimate Load), Tuning the Data Warehouse (Aggregate Performance, Data Load and Queries). Testing Data Warehouse Develop Test Plan, Testing Backup Recovery, Testing Operational Environmental, Testing Database, Testing Of the Application, Data Warehouse Features.

Unit-V

Data Mining: Data Mining Concepts, Business, Technical and Social Context for Data Mining. Data Mining Methodologies, Data Mining Techniques (Automatic Cluster Detection, Decision Tree), Building Good Effective Models, Working With Model Set, Multiple Models, Case Studies Of Data Mining Mode For an Online Bank, Wireless Communication Corporation.

Text / Reference Books:

1. Sam Anahory, Dennis Murray, "Data Warehousing", Pearson Education Pub.
2. Michael A. Berry, Gordon S. Linoff, "Mastering Data Mining", Wiley Publishing.
3. Mallach G.Fredn E, "Decision Support System And Data Warehouse Systems", TMH.
4. John Poole, Dan Chang, Douglas Talbert, "Common Warehouse Metadata Developer's Guide", Wiley Pub.

Paper- 304.2

Cloud Computing

Unit-I

Cloud Computing Fundamentals: definition, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of cloud computing-usage scenarios and Applications, Business models around Cloud – Major Players in Cloud Computing - Issues in cloud – Eucalyptus – Nimbus – Open Nebula, CloudSim.

Unit-II

Types of Cloud services: Software as a Service – Platform as a Service - Infrastructure as a Service – Database as a Service – Monitoring as a Service – Communication as a Service. Service Providers - Google App Engine, Amazon EC2, Microsoft Azure, Sales force. Introduction to MapReduce, GFS, HDFS, Hadoop Framework.

Unit-III

Collaborating on Calendars, Schedules and Task Management – Collaborating on Event Management, Contact Management, Project Management – Collaborating on Word Processing, Databases – Storing and Sharing Files – Collaborating via Web-Based Communication tools – Evaluating Web Mail Services – Collaborating via Social Networks – Collaborating via Blogs and Wikis.

Unit-IV

Need for Virtualization – Pros and cons of Virtualization – Types of Virtualization – System Vm, Processes VM, Virtual Machine monitor – Virtual machine properties – Interpretation and binary translation, HLL VM- Hypervisors – Xen, KVM, VMWare, Virtual BOX, Hyper-V.

Unit-V

Security in Clouds: Cloud security challenges – Software as a Service Security, Common Standards: The open Cloud Consortium – The Distributed management Task Force – Standards for application Developers – Standards for Messaging – Standards for Security, End user access to cloud computing, Mobile Internet devices and the cloud.

305 CYBER LAWS, INTERNET SECURITY AND CRYPTOGRAPHY

Max Marks:100

Duration: 3 Hrs.

Min.Marks:36

Unit-I

Introduction: Issue In Network Security, Threat To Network Security Service, Basic Concepts Of Encryption and Decryption, Substitution Ciphers, Transposition Ciphers. Electronic Mail Security, IP Security, Web Security, Intruders, Viruses and Worms, Firewalls.

Cyber Laws: Cyber Laws for Cyberspace- Legal Identity and International Laws in Cyberspace. IT Act 2000, IT Act 2000 in Reference To Email, E-Commerce, Issues Of Privacy. E-Contracts and IT Technology.

Unit-II

The World Of Electronic Contracts- E-Agreements and the Web Surfing, Terms Of Service Contracts, Terms Of Service Agreement for Web Site Owners, Tips of Frame, A Private Policy for E-commerce Site.

Cyber Pirates – Copyright, Digital Contents Right, Steps to Protect The Contents of WWW, Software Patent, Domain Name System and Trademarks, ICANN's Functions, Cyber Trademarks Laws, IT Act and Issues Of Copyright, Patent and Trademark, Crimes- Cyber Crimes and Future Imperfect, Strategy To Combat Cyber Crimes, IT Act 2000 And Cyber Crimes.

Unit-III

Cryptography: Basic Terms and Concepts, Brief History Of Cryptography and Cryptanalysis. Uses and Misuses. Basic Number Theory- Divisibility, Primarily, Bases, Congruence's Modular Arithmetic, GCD's Euclidian Algorithm, Fermat and Euler Theorems, Finding Large Primes, Pohlig-Hellman, RSA.

Basic Information Theory: Entropy, Equivocation, Work Factors, Key Size V/S Message Size, Redundancy, Unicity Distance and Perfect Secrecy.

Unit-IV

Elementary and Historical Ciphers: Caesar Cipher, transposition and Substitution, Poly-alphabetic Ciphers, Product Ciphers, DES, IDEA and Exponentiation Ciphers.

Cipher Modes – Block Ciphers, Stream Cipher, Public Vs. Private Keys, Meet-In-The- Middle, LFSRs. Authentication Methods- One Way Ciphers, Authentication Functions, Message Digests, MD5, SHA, Tripwire, Kerberos. Privacy-Enhanced Communication Privacy, Non-Repudiation, Digital Signatures, Certificate Hierarchies, X. 509, PGP, PKI.

Unit-V

Key Management- Threshold Scheme, Random Number Generation, Key Es-Crow, Key Recovery. Application-Mental Poker, Quadratic Residues. Oblivious Transfer and Zero-Knowledge Proofs. Digital Cash, Digital Voting and Contract Signing.
